METHODOLOGY

The GADAG District Skill Development Plan is an elaborate document summing up the skill ecosystem of the district. The document is prepared after several consultations from stakeholders such as the District Skill Development Office, the District Industries Centre, National Urban Livelihood Mission(NULM), National Rural Livelihood Mission(NRLM), Industrial Training Institutes, District Rural Development Agency(DRDA), Department of Agriculture, the Office of Deputy Director of Public Instruction, Department of Pre University Education, Department of Social Welfare, Department of Minority Welfare, Rural Self Employment Training Institute, Krishi Vigyana Kendra (KVK), and Chamber of Commerce and Industries, along with other officials of the **GADAG** district administration.

The Report draws references to several primary and secondary sources of information such as,

1. GADAG District at A Glance - by Directorate of Economics & Statistics, 2020-21
2. GADAG District Potential Linked Credit Plan (PLP), 2022-23, NABARD
3. District Industries Centre, Udyog Platform
4. GADAG District Profile, Invest Karnataka, Government of Karnataka
5. Infrastructure and SSLC Result Analysis of GADAG District,
6. Export Statistics of GADAG, Visvesvaraya Trade Promotion Centre, 2022-23
7. Economic Survey of Karnataka 2022-23
8. Directorate of Medium, Small and Micro Enterprises. "Brief Industrial Profile of Gadag District, Karnataka State"
9. Proceedings of Meetings conducted with several District and State Level Officials
10. Data Collection by the SANKALP District Co-Ordinator, Gadag
11. Discussions with beneficiaries and aspirants of skill programs, accredited Training Partners, sector experts, et al.

This District Skill Development Plan is a data and experience driven holistic report to convey the aspirations of the Gadag District.

Background :

About DSDP

Ministry of Skill Development & Entrepreneurship (MSDE) developed District Skill Development Plan (DSDP) tool kit to develop DSDP at district level. Karnataka Skill Development Corporation (KSDC) is focusing on Improved Quality and Market Relevance of Skill Development Programmes across the districts of the state. KSDC, Project Management Team (PMT) is working on the District Skill Development Plan. PMT collected data for District Skill Development Plan.

On the 'SANKALP' Portal, captured the details on District Overview, As Is Schemes, As-Is Trainer Data, As-Is ITI Trade Data, As-Is TC Information, As-Is Agri and Trainee Analysis. It helped in developing District Skill Matrix. District skill matrix is the tool to measure the skill training capacity and process maturity of the district w.r.t., Technical and Vocational Training (TVET). The district skill matrix has been designed to be in sync with the State Improvement Grant (SIG) Matrix and is structured around the three components listed below

Component 1 – Institutional Strengthening

Component 2– Enhancing Market Relevance and Quality

Component 3 – Inclusion and Access

District Skill Committees (DSCs) :

Since the District Skill Committees (DSCs) are mandated to do planning and skill training they need assistance and guidance in the form of a standard framework. For example, most of the districts across the country have DSCs, but are called with different names such as District Skill Development Committee, District Skill Development Authority etc. The members of these committees are District administration officials from the various departments like Agriculture, Industrial Training & Employment, District Lead bank, District Industries Centre, Fisheries, Horticulture, Rural Development & Panchayat Raj, Textiles etc. Members from industry and civil society organizations can also be co-opted under DSC.

4	Assistant Statistical Officer, District Skill Development Office	Member
5	Yes Team and Staff,	Member
6	Employment Officer, Gadag	Member

Objectives:

The objectives of adoption and usage of DSDP are as follows

- To understand the Skill ecosystem of Gadag district
- To create Institutional Mechanism for designing, implementation, M&E of skill development programmes and assign roles and responsibilities to streamline the process for achievement of desirable outcomes.
- To create convergence of skill development programmes to avoid the duplicity in the implementation at the district level and better utilisation of the financial resources
- To understand the type, nature and coverage of the skill development activities implemented by the other departments apart from State Skill Development Mission (SSDM)
- To understand the capacity, competence and formal recognition of existing trainers in the district
- To understand the current capacity of training partners across the variety of sectors and job roles and examine the status of adoption of NSQF framework
- To understand the current role and capacity of primary sector in the economy of the district
- To understand the coverage of marginalised communities in the demand sector and job roles, placement of the candidates, average remuneration, etc.
- To understand the progress of the skill development activities within the district against the three major components

(a) Institutional Strengthening at the District Levels for Planning, Delivering, and Monitoring of Skill Development Programmes

(b) Improved Quality and Market Relevance of Skill Development Programs

(c) Improved Access and Completion of Skill Training for Women and Other Disadvantaged Groups.

- To understand the demand and perspective of the industry in terms of expected recruitment, job roles, skill gap, quality of training, incentivization of skill workforce etc.
- To understand the gap between supply side and demand side for design and improvement of current policies and procedures.
- To create a holistic annual action plan with the defined outcomes based on the gaps identified during the study

Objective of Annual Work Plan

The objective of the annual work plan for skill development is to outline a structured and comprehensive approach to enhancing the skill levels of individuals in the district. This includes identifying and addressing the demand for skilled personnel, ensuring effective enrolment and counselling of trainees, and facilitating training and development initiatives. The specific objectives are as follows:

- To conduct thorough assessments to identify the current and future skill requirements of the local job market.
- To align training programs with the needs of industries and employers in the district and to develop strategies to increase awareness and enrolment in skill development programs.
- To ensure equal access to training opportunities for all segments of the population, including marginalized groups.
- To implement high-quality training programs those are aligned with national and international standards.
- To provide continuous professional development for trainers and educators to ensure they are equipped with the latest skills and knowledge.
- To Foster collaborations with local businesses, industries, and educational institutions to create training programs that meet industry standards and requirements.
- To facilitate apprenticeships, internships, and on-the-job training opportunities.
- To encourage and support entrepreneurship among trainees by providing relevant training, mentoring, and access to resources.
- To develop programs that foster innovation and the creation of new businesses and to offer comprehensive career counseling services to help trainees make informed career choices.
- To develop robust job placement services to connect trained individuals with suitable employment opportunities.
- To establish a system for monitoring and evaluating the effectiveness of skill development programs.
- To Use data and feedback to continuously improve program offerings and delivery.
- To ensure efficient use of financial, human, and physical resources to maximize the impact of skill development initiatives.
- To develop a sustainable funding model to support ongoing and future skill development activities.

By achieving these objectives, the annual work plan aims to create a skilled workforce that meets the needs of the local economy, enhances employability, and supports the overall socio-economic development of the district.

2. DISTRICT PROFILE OF GADAG

Gadag is located in the Northern Karnataka between 15.15 and 15.45 North latitude and 75.20 and 17.47 East longitude, with border districts Dharwad in the West, Koppal in the East, Haveri in the South west, Ballari and Vijayanagara in the South East, Bagalkot in the North, and Belagavi in the North West. As shown in Fig 2.1 Gadag district has 7 talukas – Gadag, Gajendragad, Ron, Lakshmeshwar, Shirahatti, Mundaragi, and Naragund. According to the 2011 population, 35% of the district

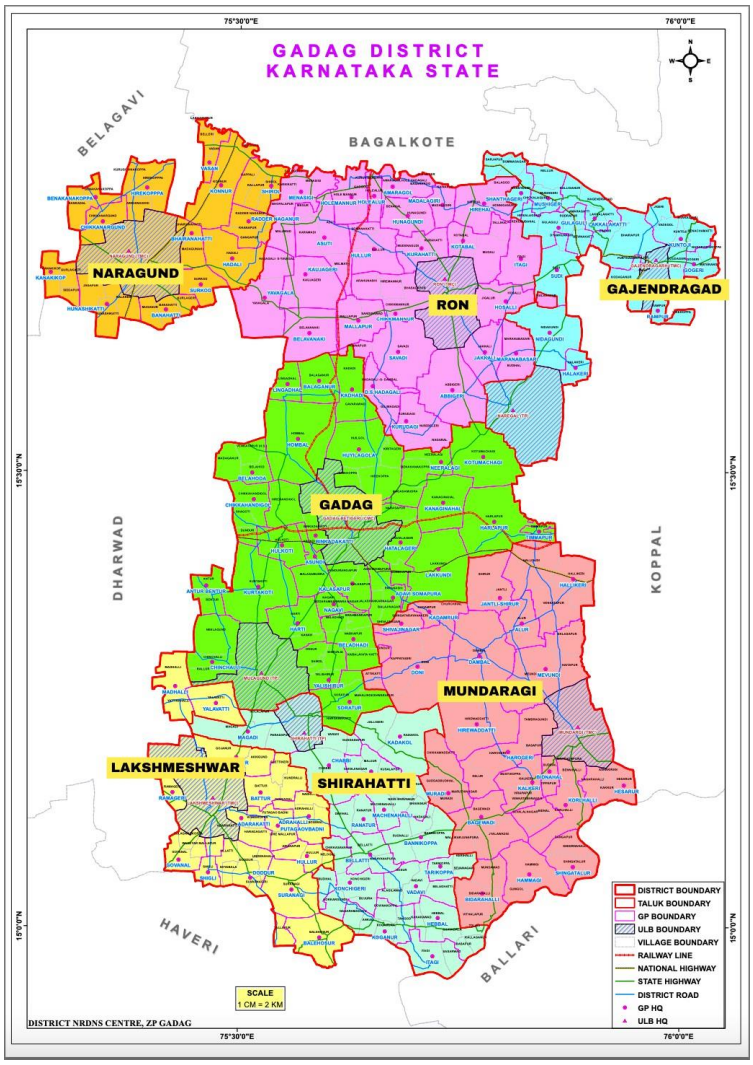

Figure 2.1: Map of Gadag District

population was Urban. The district has a sex ratio of 978 females for every 1000 males and a literacy rate of 75.18%. The Hindus are in the majority in the district with 85.27% of the population, Muslims are second largest with 13.50%, and Jains are the third largest religion in the district. Kannada is the primary language of the district spoken by 85.32% of the population, Urdu is the second most spoken language with 8.37% population of speakers, and Lambani is the third most spoken language

with 2.84% of the population of speakers. The 2024 expected population of the district is projected at 1170000, with male and female populations at 5,86,911 and 5,83089 respectively.

The climate of Gadag district is quite agreeable and healthy. Within the district the southern belt has a more pleasant weather. The year is usually divided into four seasons. Summer sets in during the second half of February and lasts till the end of May. This season is marked by harsh eastern winds, rising temperatures, whirlwinds, and occasional thunderstorms accompanied by sharp showers. South-west monsoon season starts during early June and lasts till the end of September. This is a period of cool and damp climate. The months of October and November constitute the post monsoon, or the north-west monsoon season and this period witnesses a gradual rise in day temperatures and a substantial amount of rainfall as well. The winter season covers the period from December to mid- February. The district enjoys moderate weather and is not subject to extremes either during summer or winter. However due to the erratic nature of the rainfall and Gadag's position in the rain shadow region of Western Ghats, the district is prone to drought.

The average maximum temperature of 37.3 C is in the month of April. December has the minimum temperature of 16.5 C. Gadag district receives average annual rainfall of 612.5 mm and within the district the quantum of rainfall and the average number of rainy days decreases as one moves from west to east. During the south west monsoon 56 percent of the annual rainfall precipitates.

Only about 7 percent of the total geographical area is covered by forests and a large part of it belongs to the shrub category. The district is deficient in forest wealth and the same holds true for the fauna as well.

3. DEMOGRAPHY

3.1 POPULATION

Total Scheduled Castes (SCs) population reported in the district is 1,74,196 persons, constituting about 16.36 percent of total population of the district. The decadal growth rate of Scheduled Castes as per 2011 Census is 26.77 percent. The proportion of Scheduled Castes in the district to total SCs in the State is 1.66 percent. The growth rate of Scheduled Tribes (STs) during the decade 2001-2011 is 13.31 percent and about 5.79 percent of the district's total population is Scheduled Tribes. The share of district's STs to total Scheduled Tribes in the State is 1.45 percent. The decadal change in the growth rate of SCs and STs among female population has reported to be high compared to the growth rate of male population, more significant is the growth rate of female SC population which is 30.91 percent. Overall population growth rate of female population in all categories is something to be noted about.

It is important to study major crop production of the district as it determines what a district is able to grow as a food source, either for local use or export purposes. As depicted in the Chart 3.2 above, Pulses and Maize constitute most of the land utilized for cultivation.

Following are some of the schemes active in the State and Gadag District for Agriculture sector:

1. CHIEF MINISTER RAITHA VIDYA NIDHI:

Raitha Vidya Nidhi was launched on 7th August 2021 by Government of Karnataka in order to provide scholarships to farmers' children. Children of farmers who wish to pursue higher education will receive scholarships ranging from Rs 2500 to Rs 11000 through this scheme. By using the direct benefit transfer method, the scholarship amount will be transferred directly to the beneficiary's bank account. Every student in Karnataka will be able to receive higher education under this scheme. On 11th April 2022, the Government of Karnataka announced the extension of this scholarship scheme.

Farmers' children are primarily targeted by this scheme in order to promote higher education. Additionally, the implementation of this initiative will encourage the children of farmers to pursue higher education, and a higher literacy rate would be achieved in the state. An unintended benefit of this scheme is also to promote the profession of farming.

2. Pradhan Mantri Kisan Samman Nidhi (PM KISAN)

The Pradhan Mantri Kisan Samman Nidhi (PM-Kisan) was launched by Government of India in 2019. Its main intention is to provide income support to the families of landholding farmers in India. Essentially, this scheme provides farmers with supplemental financial assistance to help them procure various inputs related to agriculture and related activities, as well as their domestic needs. Every landholding farmer's family who owns a cultivable plot of land receives PM-Kisan income assistance. According to the scheme guidelines, the State Government and UT administration identify farmers who are eligible for financial assistance. This scheme directly transfers funds to the beneficiaries' bank accounts after they have been identified.

A landholder farmer's family may benefit from this scheme if they meet certain conditions. According to the scheme guidelines, a landholder farmer's family is defined as a couple and their minor children, who own cultivable land per the land records of the state or territory they reside in. Beneficiaries are identified through existing landholding system.

2. Zero Budget Natural Farming (ZBNF)

In the Zero Budget Natural Farming system (ZBNF), the principles of sustainable agriculture are harmonious with those of agro-ecology. A number of issues associated with farmer livelihoods act as obstacles to their sustainability are addressed. Karnataka Rajya Raitha Sangha (KRRS) collaborated with Mr. Subhash Palekar to learn and implement the practices for natural farming. To make farmers more proficient in this sustainable farming technique, workshops and training camps have been conducted in the state.

In accordance with agro-ecology principles, Karnataka state is divided into ten climatic zones, and each zone requires a distinct approach. Hence, the state has launched ZBNF on a pilot basis, establishing a network of state universities and research centers across each zone, which has been allocated a total of 2000 hectares for frontline demonstrations. A decrease in the number of pest attacks and the need for credit were observed among the households that had improved soil health and seed autonomy.

3. Rashtriya Krishi Vikas Yojana (RKVY RAFTAAR)

Ministry of Agriculture and Farmers' Welfare (MoA&FW) of Government of India has designed this unique scheme called Rashtriya Krishi Vikas Yojana – Remunerative Approaches for Agriculture and Allied Sectors Rejuvenation (RKVY- RAFTAAR). In order to promote Agripreneurship and Agribusiness, the project aims to improve infrastructure in the agricultural sector and foster a system of business incubators.

This unique scheme helps the agri startups to survive the tides of uncertainty by offering comprehensive set of benefits such as –

- Capacity Building programs such as Startup Incubation Program, Business Plan, Stratton, Ideation Competitive events Networking & facilitated learning sessions.
- Focused group mentoring and one-on-one mentoring with wide pool of subject matter experts
- Regulatory and Advisory Guide for Market study and strategic analysis, Structuring an entity, Business planning, options to secure funds and opportunities.
- Intellectual Property Rights - Filing of Patents, Copyright and trademarks etc. One-on-one Counseling session with Innovators and Startups to nurture innovation, IPR Support for technology commercialization.
- Furnished Infrastructure like Startup workstations well equipped with internet Wi- Fi connection, Productive Meeting and Conference rooms and High-tech Conference Management System (CMS)
- Funding Opportunities Making Startup ready for grand challenges of funding, assisting startups to apply for Grant, Equity and Debt funding scheme.

4. Krushi Bhagya :

Krishi Bhagya Scheme was set up by the Government of Karnataka exclusively for dry-land farmers who depend on annual rainfall for their livelihood. Due to the fact that over 70% of Karnataka's agricultural land is rain-fed, farming activities on those arid plains become difficult during periods of irregular rainfall. The Krishi Bhagya Scheme was established to enable irrigation for sustainable agriculture. To increase productivity, this program includes sophisticated rainwater conservation efforts. The government has provided financial support to more than one lakh farmers in 131 taluks across 25 districts, totaling 968.37 crores.

Karnataka's agriculture industry is being transformed by the government. The program's execution seeks to increase farmer's income by using on-farm rainwater conservation measures. It also promotes farmers to employ advanced irrigation systems to save water. The plan is implemented in five agro-climatic regions with average rainfall ranging from

450 to 850 millimeters. Every year, the initiative would be conducted on 45 thousand hectares, benefiting over one lakh farmers.

Farmers receive funds under the plan to build farm ponds (Krishi Honda) to retain rainwater and to purchase lift pumps and diesel engines to draw water during droughts. This plan uses cutting-edge technology to increase agricultural production per drop of water. Furthermore, this initiative helps farmers make more money by allowing them to build polyhouses and install shade nets to grow hybrid vegetables and flower products.

5. National Mission for Sustainable Agriculture (NMSA)

Natural resources such as soil and water and their quality are critical to agricultural output. Agricultural expansion may be sustained by supporting. conservation and long-term use of these limited natural resources through location- specific policies. Rainfed agriculture continues to dominate in India, accounting for over 60% of the country's net planted area and 40% of total food output. Thus, protection of natural resources combined with the expansion of rainfed agriculture is the key to meeting the country's growing food grain need. The National Mission for Sustainable Agriculture (NMSA) was created to improve agricultural production, particularly in rainfed areas, by concentrating on integrated farming, water usage efficiency, soil health management, and resource conservation synergy.

NMSA will address important aspects such as 'Water use efficiency,' 'Nutrient Management,' and 'Livelihood diversification' by following a self-sustaining path of development that includes gradual acceptance of environmentally friendly technologies, efficient energy equipment, resource conservation, integrated farming, and so on. NMSA also seeks to promote enhanced agronomic practises in specific places through better soil management, continued to improve water use efficiency, prudent chemical use, crop diversification, progressive adoption of crop-livestock farming methods, and combination of strategies such as crop-sericulture, agro-forestry, and fish farming, among other things.

6. National Food Security Mission (NFSM)

The National Development Council (NDC) issued a decision on May 29, 2007, at its 53rd meeting, to begin a Food Security Mission to boost rice output by 10 million tonnes, wheat production by 8 million tonnes, and pulses production by 2 million tonnes by the conclusion of the 11th Plan

(2011-12). As a result, in 2007-08, the 'National Food Security Mission (NFSM)' was formed as a Central Sector Scheme to put the above-mentioned decision into action. The NDC decided that agricultural development plans needed to be reoriented to satisfy the demands of farmers, and it urged the federal and state governments to adopt a plan to revitalise agriculture. During the 11th plan, the NDC reiterated its goal to achieving 4% annual growth in the agriculture sector.

Following are the objectives of the program:

A. Enhancing rice and pulse output in a sustainable way by expanding land and improving productivity.
B. At the agricultural level, maintaining soil quality and production.
C. The generation of job possibilities.
D. Increasing farm-level economic activity and restoring farmer moral

8. Agricultural Technology Management Agency (ATMA) Scheme

Most farmers benefit from the Agricultural Technology Management Agency (ATMA) plan, which helps them overcome technical gaps in the business. The project intends to centralize agricultural technology transfer management by establishing organizational structures and employing new technologies. ATMA is a registered organization in each state that invites farmers, farmer groups, Panchayat Raj Institutes, NGOs, Krishi Vigyan Kendra's (KVKs), and other parties to participate in this farmer-centered extension system at the district and local levels. It provides farmers with technical assistance and training on new methods and technology.

Following are the objectives of the Scheme:

A. At the state, district, and village levels, new, organized, and centralized institutions are being established.
B. Using creative and effective operating techniques to strengthen the currently existing extension system.
C. Decision-making should be simplified and decentralized to the district and block levels.
D. Moving on with the extension services' viability.
E. Farmers are encouraged to participate in program development, coordination, and resource sharing in order to increase their responsibilities.

F. Building stronger ties between important government agencies, research organizations, and stakeholders.

G. Providing a structural system for the coordination and monitoring of upgrading efforts at the district and village levels by different entities involved in technology modification and distribution.

H. Improving the quality and variety of technologies available.

I. Developing partnerships with third-party organizations such as NGOs and Panchayat Raj institutions, among others.

J. Using agricultural system improvements and farmer organization to overcome technology disparities and poor natural resource management.

K. Taking up the topic of gender issues by forming groups of women farmers and providing them with advanced training.

L. Under ATMA, farmers may get technical guidance on new techniques and technology, which has resulted in a higher/rational application of new methods and technologies.

M. ATMA is a district-wide institutional vehicle for coordinating and managing the Agricultural Extension System.

9. Karnataka Raitha Suraksha Pradhana Mantri Fasal Bima Yojana :

Government of India launched the Pradhana Mantra Fasal Bima Yojana in February 2016. Under this scheme, Government of Karnataka will provide insurance to farmers for their yields. PM Fasal Bima Yojana replaces two of the earlier schemes of the government namely, National Agriculture Insurance Scheme and Modified Agriculture Insurance Scheme. Modernisation of techniques in agriculture is one of the primary intentions of the programme. Oil Seeds, Food Crops, Commercial Crops, and Horticulture Crops are some of the crops covered under this scheme.

10. Raitha Siri :

Farmers are often exposed to natural disasters that threaten their harvests. This problem proves to be a significant disappointment since it reduces crop output or quality. Farmers are forced to suffer financially as a result of this. In general, despite its drawbacks, farming is a financially disappointing career. Under the strain of earning or investing, they wind up taking out loans or taking significant measures. As a result, the state and federal governments implement numerous benefit plans to aid farmers

during these difficult times. The Raitha Siri plan of the Karnataka government is similar.

11. Raitha Samparka Kendra :

Raitha Mitra Yojane was established in the State in 2000-01 to address the expanding needs of the farming community in search of cutting-edge technology. As a result, 747 Raitha Samparka Kendras have been constructed, one at each level of the hobli (sub-block). Each RSK is led by an Agricultural Officer (Agricultural Graduate) who is assisted by Assistant Agricultural Officers and Agricultural Assistants, the number of whom is determined by the agricultural potential of the region in terms of cropping intensity, irrigation facilities, crop diversification, and so on. At the hobli level, RSKs have been established to give farmers with information on crops, irrigation, agricultural techniques, available technology, and market facilities.

12. National Mission on Oilseeds and Oilpalm :

India is a significant producer and importer of edible oils from oilseeds. After the United States, China, and Brazil, India's vegetable oil economy ranks fourth in the world. Oilseeds account for 13% of gross cropped area, 3% of GDP, and 10% of total agricultural commodity value. During the previous decade, this industry saw yearly growth rates of 2.44 percent, 5.47 percent, and 2.96 percent in terms of area, output, and yield (1999-2009).

The country's unique agro-ecological conditions are ideal for cultivating nine annual oilseed crops, including seven edible oilseeds (groundnut, rapeseed, and mustard), as well as two non-edible oilseeds (sunflower, sesame, safflower, and Niger) (castor and linseed). Oilseeds are grown on around 27 million hectares across the country, mostly on marginal terrain, with rainfed farming accounting for 72 percent. Domestic edible oil consumption has expanded significantly in recent years, reaching. 18.90 million tonnes in 2011-12 and is expected to continue to rise. With a predicted population of 1276 million people and a per capita consumption of 16 kg/year/ person, total vegetable oil demand is expected to reach 20.4 million tonnes by 2017. Palm oil imports from Indonesia and Malaysia account for a significant share of our edible oil needs.

13. Atal Bhujal Yojana

The Atal Bhujal Yojana is a government-led effort aimed at safeguarding the long-term viability of the country's groundwater supplies. The Ministry of Jal Shakti's Department of Water Resources, River Development & Ganga Rejuvenation is using a combination of top down and bottom-up strategies in recognized ground water stressed blocks across seven states, representing a variety of geomorphic, climatic, hydrogeologic, and cultural settings. The main goal of ATAL JAL is to develop the institutional framework for participatory ground water management and to bring about behavioural changes at the grassroots level for long-term ground water management. This will be accomplished through a variety of interventions, such as awareness campaigns, capacity building, the convergence of existing/new schemes, and better farming methods, among others.

4.3 IRRIGATION

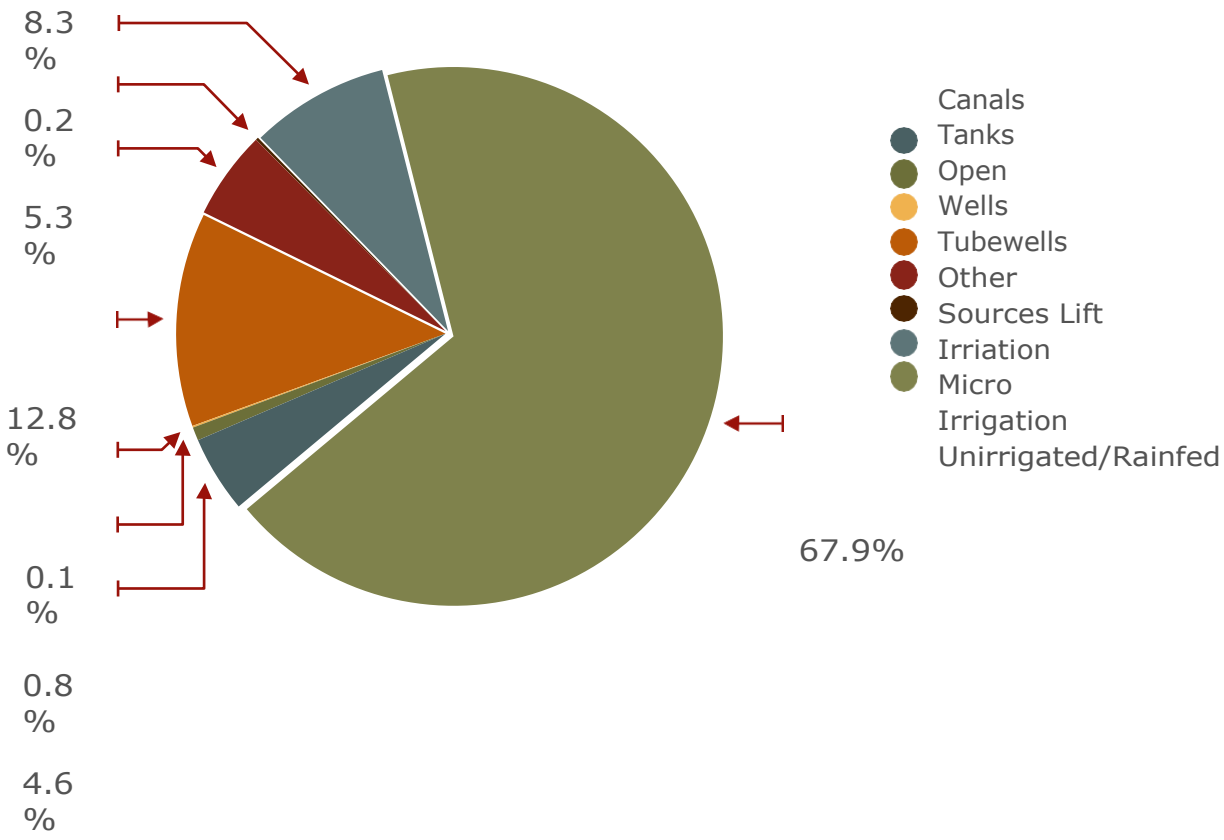

Chart 4.3 : Percentage share of Irrigation Methods in the Gadag District

There is no major irrigation project in the district, which indicates vulnerability of the agricultural economy and emphasizes the importance of dry land farming in major part of the district. However, the Right Bank canal of Malaprabha Project located in the neighboring Savadatti taluk of Belgaum district irrigates the entire Naragund taluk and some portion of Ron taluk and also, the Tungabhadra River which flows along the border of the district provides irrigation to some areas in the Southern part of Mundargi and Shirahatti taluk.

A major part of the sown area is rain-fed or unirrigated land. It constitutes for around 68% of the total sown area. Tube wells, Canals, and Micro irrigation methods are the other main source of irrigation. The total irrigated land comprises of only 23.94% of the Net Sown Area.

Canals are mainly seen in Naragund Block of the district that are constructed through the Upper Krishna Projects.

4.4 INDUSTRIES

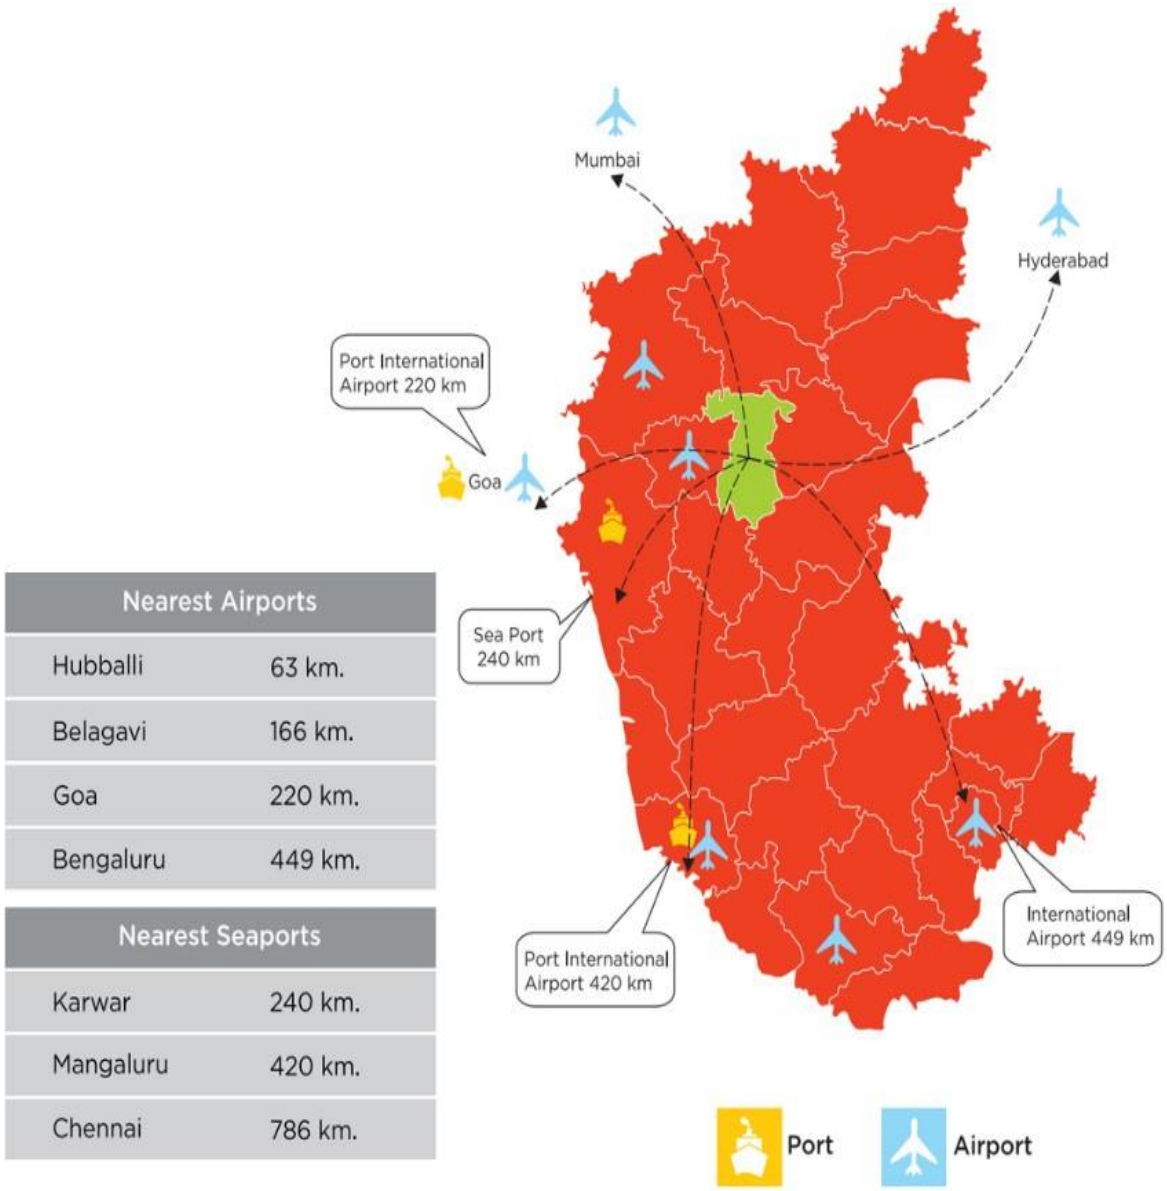

Textile and Agro businesses are an important part of the district's economy. There are 8036 Small Scale Units, and 122 Factories, that employs nearly 40,000 workers in the district. The total production of food grains and oilseeds in Gadag district during 2019-20 was over 1.51 lakh MT. The production of major fruits was 0.40 lakh MT and vegetables was 1.93 lakh MT. The district produces, annually, 0.87 lakh MT of milk, 339 lakh eggs, 304 tons of meat and 834 tons of fish. The post-harvest losses are very high in agriculture, especially under horticultural crops. The value addition in food, fruit, vegetable, and animal husbandry is minimal. There are 59 small scale food processing industries and 1 large scale Sugar factory in the district. There are 202 milk societies with 24861 members. The potential activities in the district are processing of coarse cereals, minor millets, pulses, oilseeds, fruits, vegetables, milk etc. Other prominent sector of industry is Renewable Energy. 25 major companies have set up Solar and Wind farms in the GADAG District.

Following are the Major Industries in the District –

- Enercon India Pvt. Ltd.
- Vijayanagar Sugars Pvt Ltd.
- Pointek Pens(P)Ltd.
- Suzlon Wind Power Resources
- The Gadag Co-operative Textile Mill Ltd.
- The Farmer Co-operative Spinning Mill Ltd.
- The Farmer Co-operative Oil Mill Ltd.
- The Karnataka OEM Nut Bolt & Spare Parts.,
- Sankeshwar Printing, Hombali Brothers and Shambadi Printing Press

4.5 CONNECTIVITY

- ✦ Ankola-Gooty (in AP) National Highway 63 passes through Gadag Town in the district
- ✦ Vijayapura-Hubballi National Highway 218 passes through Naragund Town in the district
- ✦ Bengaluru-Hospet-Gadag-Hubballi railway line passes through Gadag
- ✦ Gadag-Bagalkote-Vijayapura-Sholapur(Maharashtra) railway line passes through the district

Nearest Airports	
Hubballi	63 km.
Belagavi	166 km.
Goa	220 km.
Bengaluru	449 km.

Nearest Seaports	
Karwar	240 km.
Mangaluru	420 km.
Chennai	786 km.

Figure 4.5 : Major Connectivity Infrastructure of Gadag District

✦ New broad-gauge line is being developed to connect Wadi to Gadag.

5. RENEWABLE ENERGY HUB

Gadag District which mainly falls under the Deccan plateau region of the Karnataka state, and with only 7% forest cover, gets more than 310 sunshine days throughout the year. The wide expanse of flat landscapes favor the installation of solar panels.

TABLE 5.1: RENEWABLE ENERGY PROJECTS IN GADAG

Sl. No.	Taluk	Solar		Wind	
		Installed Capacity (MW)	No. Of Projects	Installed Capacity (MW)	No. Of Projects
1	Mundaragi	22	3	38.8	1
2	Gadag	142	5	269.8	6
3	Laxmeshwar	5	2	–	–
4	Shirahatti	20	1	269	8
5	Naragund	20	1	27.2	2
6	Ron	20	1	62.5	2
7	Gajendragad	–	–	33.6	1
Total		229	13	700.9	20

The district gets less than 700mm rainfall in a year, therefore more and more farmers are abandoning agriculture as a profession and are migrating to other feasible jobs. This scenario opens up prime opportunities for the district to use those abandoned farmlands for installation of solar power projects under the Utility Scale Projects category. Under utility scale projects the minimum capacity for solar power generation is 1 MW and maximum capacity is 3 MW. The solar power generated through this method is purchased by the ESCOMs.

The district also has a huge potential for Wind energy. The flat landscapes favour an uninterrupted speed of wind that is necessary for windmills.

As depicted in Table 5.1, Gadag taluk of the district has the highest installed capacity of Wind and Solar plants. Shirahatti taluk has the second highest installed capacity of Wind energy plants. As of 30.6.2022, more projects in renewable energy sector with an installed capacity of around 1000 MW are commissioned by the Government of Karnataka.

6. EMPLOYMENT SCENARIO

India's employment share in agriculture is declining but non-farm employment has not yet got much attention for the employment. In most developing countries like India, the employment sector has an important role in their development. Bihar's rural population

is predominantly dependent on agriculture and allied sectors for their livelihoods. Rural areas have features such as a poor productive base, limited absorptive capacity, limited linkages to use indigenous products to reinforce the local economy in a value- added sequence and disparaging institutional and market mechanisms foremost accentuation of the phenomenon of unequal exchange with other areas are, more or less, common to most poor areas. The data provided in Table 6.1 is collected from the District Industries Centre.

TABLE 6.1: AS-IS SCENARIO OF INDUSTRIES IN GADAG DISTRICT

Sl. No	Size of the Industry	Type of Industry	Number of Factories/ Units	Male Employees	Female Employees	Total Employed
1	Factories	Textiles	33	825	264	1089
2		Chemicals	4	102	3	105

15		Others	4126	15857	6222	22079
TOTAL			**16915**	**57657**	**26304**	**83961**

7. MIGRATION

Migrant workers contribute to growth and development in their places of destination, while places of origin greatly benefit from their remittances and the skills acquired during their migration experience. Yet, the migration process implies complex challenges in terms of governance, migrant workers' protection, migration and development linkages, and international cooperation. The district administration works to forge policies to maximize the benefits of labour migration for all those involved.

Table 7.1 depicts the migration pattern of Gadag District. The data is collected from 2011 census and shows that around 25000 persons migrated to other states in India in search of education and livelihood opportunities.

TABLE 7.1 : MIGRATION PATTERN OF GADAG DISTRICT

SL No	Migration Parameter	Last Place of Residence	Persons	Total Persons	Reason
1	Total Outward Migration (from the place of enumeration)	-	-	495567	Education and Livelihood opportunities
2	Intra District	-	-	267030	
3	Inter District	-	-	220797

8. SKILL ECOSYSTEM

There are 1116 schools in Gadag with total enrolment of 1,86,941 students. The average student teacher ratio for primary schools is 32. Gadag and Shirahatti have the lowest student-teacher ratio at 34, and Rona has highest at 28.

TABLE 8.1 : AS-IS SCENARIO OF EDUCATIONAL INSTITUTIONS

Institutions	Numbers
Lower Primary Schools (1st to 5th)	269
Higher Primary Schools (6th to 8th)	526
High Schools (9th & 10th)	321
Pre-University Colleges (11th & 12th)	103
ITI Colleges	46
General Degree Colleges	23
Ayush Medical Colleges	4
Allopathy Medical Colleges	1
Polytechnic Colleges	7
Engineering Colleges	3

Source: Gadag District At A Glance, 2020-21

There are 103 PU Colleges with total enrolment of 20,849 of which 53 percent are girl students. 9 government General Degree Colleges have a total of 7172 students enrolled, and 14 private General Degree Colleges have a total of 5874 students enrolled. Girls' students enrolled in government colleges make 60 per cent of the total students, and percentage of girl students enrolled in government colleges is 34 percent more than in private colleges.

Figure 8.2: TATA Technologies Limited Workshop at Government ITI, Gadag

There are 46 ITI colleges, of which 9 are Government ITI colleges - Gadag, Naragund, Sudi, Mundaragi, Sorautur, Shirahatti, Kurtakoti, Yavagal and Hombal out of these only 4 government ITI colleges are part of the initiative from TATA Technologies Limited, where the workshops are upgraded with cutting edge tools to facilitate modern job roles.

Electrician, Fitter, Advanced CNC Machining Technician, Basic Designer and Virtual Verifier, Industrial Robotics and Digital Manufacturing Technician, Manufacturing Process Control and Automation, Mechanic Electric Vehicle are some of the job roles taught in the Government ITI Colleges.

Other Key Educational Institutions:

- Gadag Institute of Medical Sciences (GIMS)
- K.L.E. Society's S.A. Manvi Law College
- Rajiv Gandhi Ayurvedic Medical College
- R.T.E. Society's Rural Engineering College
- Karnataka State Rural Development and Panchayat Raj University

SHORT TERM TRAINING INSTITUTIONS:

kaushalkar.com is the skill portal launched by Karnataka Skill Development Corporation. The portal aims to converge all the skill aspirants, skill providers, and industries/employers. According to Table 9.2, around 51,774 candidates in the district have registered in the Kaushal Karnataka Portal, the state skill portal, to seek skill training under various sectors. 2-Wheeler - Delivery Associate, AC Specialist, Accounts Executive, Sewing Machine Operator, and Hand Embroiderer were some of the skills aspired by the candidates registered in the portal.

To address these aspirations there are 2 Pradhan Mantri Kaushal Vikas Yojana (PMKVY) training centres, and 8 Chief Minister's Kaushalya Vikas Yojana training centres in the district. CEDoK is also in active in the district to boost the entrepreneurial ventures.

TABLE 8.3 : KAUSHALKAR.COM REGISTRATIONS

Registrations in State Skill Development Website from Gadag District	
Registrations	51774

TABLE 8.4 : SCHEMES ACTIVE IN THE DISTRICT

Sl. No.	Schemes Active in the District	Number of Training Centres
1	Pradhan Mantri Kaushal Vikas Yojana (PMKVY)	2
2	Chief Minister's Kaushalya Vikas Yojane (CMKKY)	8
3	Centre for Entrepreneurship Development of Karnataka (CEDoK)	1

6	Handlooms and Textile Department Training	1
7	Rural Self Employment Training Institute	1
8	Department of Agriculture - ATMA Training	1

9. SKILL GAP STUDY

Textiles and clothing industry

Gadag district had four textiles based factories under large and medium scale industrial units, employing about 1,500 workers. Apart from these big units, there are small units that are engaged in this industry. The main reason why these units are thriving in the district is because of availability of labour. Also, the people are well versed in the basic skills as this is a traditional sector. The basic weaving is done here and the fabrics are sent to main centers in other cities for finishing and packaging.

Figure 10.1 explains the value chain of the textile and clothing industry. Of the entire value chain, only weaving segment exists in Gadag district.

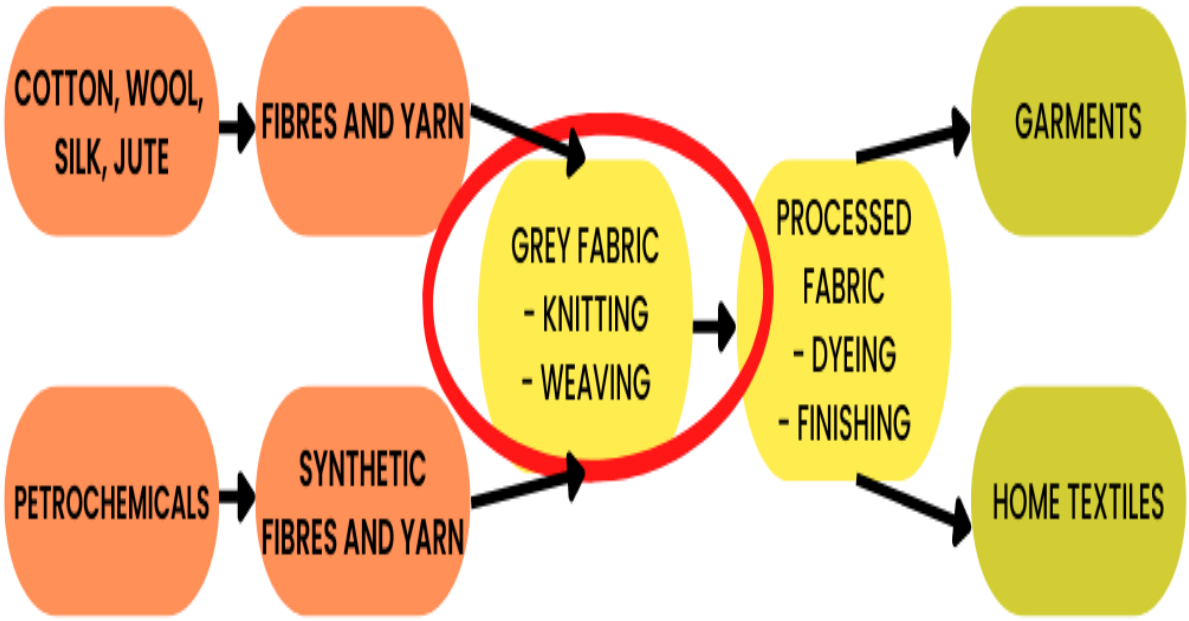

Figure 9.1 : Gadag District's Standing in the Value Chain of Textile Industry

Figure 9.2 : Looms In Gadag District

Skill Gaps in Textile Industry

TABLE 9.2 : AS-IS SCENARIO SKILL GAP STUDY OF GADAG DISTRICT

Role, educational qualification	Expected competency	Skill gaps
Manager/ supervisor /floor in-charge (Graduate)	• Managing all the facilities and the functioning of the workforce. • Supervising of the work conducted by operators and conducting quality checks. • Knowledge of pattern making. • Ability to undertake inspection, production planning and control. • In-depth knowledge of production processes and inspection methods. • Leadership skills • Soft skills and interpersonal skills	• Most of the managerial / supervisory staff is hired from Hubli, as people with such skills are in scarcity in Gadag district.
Operators (illiterate to 10th pass, trained in tailoring from Private Training Providers or training provided by Department of Textiles)	• Good machine control – knowledge of threading, weaving patterns on different shapes and following the specifications. • Knowledge of machine maintenance procedures • Knowledge of pattern making, grading, and draping • Ability to work in teams / inter-personal skills. • Soft skills	On the job training provided for one week, on joining of job to explain requirements and basic skill-up gradation. Even those who are trained before the job must be re t rain e d, e s pe c iall y on running of machines, as the training institutes do not have good machine infrastructure.
Quality control executive (Graduate and with s o m e experience in garment industry)	• Ability to inspect if the garments have been weaved as per given specifications and instructions. • Ability to check for quality adherence. • Ability to understand and prevent defects like size	On-the job training provided as such skills are lacking in persons trained at training institutes and usually come from experience only.

	variations, loose threads, stains etc.	
Helpers (illiterate to 10th pass)	• Ability to cut the cloth based on specifications. • Ability to button the stitched garments. • Ability to put tags on the stitched garments. • Ability to iron the ready garments properly. • Ability to iron the garments • Ability to pack the garments in bundles	Basic skills required for this profile, for which no / minimal training required. Mostly provided easily on the job.

Source: IMaCS Analysis

10. EMPLOYMENT POTENTIAL

We have forecasted incremental demand and supply of human resources for high growth sectors identified by NSDC. As shown in Table 11.1, we estimate that between 2012 and 2022, an incremental demand for 96,287 persons is likely to be generated in Gadag district. Agriculture and allied activities are expected to remain the biggest employers. As the economy grows, employment demand in supporting sectors such as construction, transportation, healthcare and education is also expected to increase at a faster rate. There is also maximum demand for semi-skilled people, especially in welding, fitting and masonry.

The incremental supply of workforce between 2012 and 2022 is estimated at 1.41 lakh. This is higher than the demand. This higher supply results in skilled workforce migrating from the district. Given the proximity to Hubli many go there. But, some also migrate to Mumbai and Bangalore. These people are employed across various sectors like manufacturing, engineering and IT. The demand in Gadag is dominated by the minimally skilled. This is due to the lack of sufficient employment generation in the district by other sectors.

TABLE 10.1 : SECTOR-WISE INCREMENTAL DEMAND OF EMPLOYMENT

Sector	Total	Minimally Skilled	Semi-skilled	Skilled	Highly Skilled
Agriculture and Allied	37983	31634	4728	860	760
BFSI	4029	-	2417	1209	403
Building, Construction Industry and Real Estate	20308	6092	10154	3046	1015
Construction Materials and Building Hardware	1,261	126	820	252	63
Education and Skill Development	7374			6637	737
Furniture and Furnishings	150	60	60	22	7

11. SWOT ANALYSIS

A SWOT analysis is a planning tool which seeks to identify the Strengths, Weaknesses, Opportunities and Threats involved in a project or organization. It's a framework for matching an organization's goals, programmes and capacities to the environment in which it operates.

11.1 STRENGTHS

(1) Well established textile sector– there are over 800 Small Scale Textile Units and 26 textile factories in district employing over 6000 persons.

(2) Upcoming Solar Projects – there are 13 established solar projects with an installed capacity of 230 MW. New projects are commissioned by the Government of Karnataka.

(3) Upcoming Wind Projects – there are 20 establishes wind projects with an installed capacity of 700 MW. New projects are commissioned by the Government of Karnataka.

(4) 39 ITI Colleges, and other well-established educational institutions create a portion of skilled workforce in the district.

(5) Producer of crops like pulses, groundnut, cotton that are good value addition crops.

11.2 WEAKNESSES

(1) In the entire district there is only 1 large scale industry and 122 medium-scale factories that employs barely 5000 persons.

(2) Inadequate infrastructure to support the growing population.

(3) Slow pace of urbanization – only 36% of the district is urbanized, and the rate of urbanization is one of the slowest in Karnataka.

(4) No value addition of crops cultivated – Many potential value-addition crops that are cultivated are directly sold in APMCs, which are further exported to different states for value addition.

(5) Dependency on agriculture – the economy of the district is mainly dependent on agriculture, with low rate of migration to other sectors.

(6) Inequity in the literacy rate – The male literacy rate is 73.9 per cent and female literacy rate is 57.4 percent. The urban literacy rate is 71.3 per cent, and rural literacy rate is 62.7 per cent.

11.3 OPPORTUNITIES

(1) Scope for Agro-based industries – As the district is dominant in agriculture, there is scope to set up a Agro Industrial Hub for food processing and value addition

(2) Potential to become a Renewable Energy hub - the landscape of the district favors establishment of hub for renewable energy sector and for the development of skilled workforce in this sector.

(3) Spinning mills are well-established, so opportunity for garment factories – The availability of textile factories and spinning mills, there is scope to set up garment factories as well.

(4) Several native crafts exist, scope for expansion of its market – the people of Gadag District are skilled in several traditional handicrafts like Kaudi making, Lambani Embroidery, Kasuti Embroidery, Wood carving, Stone carving. Therefore, there is a huge scope to provide forward linkage for these crafts.

(5) Scope for promoting SHGs engaged and cottage industries – several Self Help Groups are involved in cottage industries, such as, agarbatti making, local food products, etc.

11.4 THREATS

(1) Drought Prone district – there is acute water shortage in the district. 68 per cent of the sown area is rained. And due to lack of rainfall and changing climatic conditions, the district is vulnerable to drought.

(2) Flood Prone - Gadag lies in Bennihalla River basin, which is the tributary of Malaprabha river.

(3) Outward migration of skilled workforce – due to lack of major industries in the district, the skilled workforce tends to migrate to other districts and other states for skilled jobs.

(4) Neighboring Dharwad district attracting industries – Hubballi region of Dharwad district already attracts lot of industries due to well-established infrastructure.

12. PROPOSED ACTION PLAN

There are a lot of potential investment opportunities in the district, especially in construction sector for the development of infrastructure like Roads, Highways, etc. As agriculture is the dominant economic sector in the district, there is a huge scope for development of Agro Industrial Hub to set up value chain of the crops that are prominently grown like pulses, groundnut, cotton, onion, etc. To facilitate these sectors, the district skill development plan proposes new job roles to be incorporated in the training centers.

12.1 Collaboration of TATA Technologies upgraded Government Industrial Training Institutes with Engineering & Polytechnic Colleges in the district –

Figure 12.1 : Collage shows TATA Technologies Workshop at Government ITI College, Gadag

The Government Industrial Training Institutes have signed a Memorandum of Understanding with the Engineering and Polytechnic Colleges of the district to combine and synergies' the expertise of ITIs and Engineering colleges. The objective is to impart internship training for students in Government Industrial Training Institute Upgraded into Technology Hub in Collaboration with TATA Technologies Ltd., (TTL), Gadag. And to provide the facilities available in the Government Industrial Training Institute Upgraded into Technology Hub to conduct the project work and research and development work (R and D) for students. The following streams are incorporated for this initiative – Civil Engineering, Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering, Information Science & Engineering, and Mechanical Engineering.

12.2 Setting up of Agro Industrial Hub

An agro-industry is an enterprise that processes biomass, i.e. agricultural raw materials, which include ground and tree crops as well as livestock and fisheries, to create edible or usable forms, improve storage and shelf life, create easily transportable forms, enhance nutritive value, and extract chemicals for other uses. As the products of agro-industries are both edible and non-edible, the agro-industries can be classified as agro-food industries (or merely food processing industries) and agro- non-food industries. The agro-industry provides the crucial farm-industry linkage which helps accelerate agricultural development by creating backward linkages (supply of credit, inputs and other production enhancement services) and forward linkages (processing and marketing), adding value to the farmer's produce, generating employment opportunities, and increasing the farmer's net income. This in turn motivates the farmer for better productivity and further opens up possibilities of industrial development. The agro-industry generates new demand on the farm sector for more and different agricultural outputs which are more suitable for processing. An agro-processing plant can open up new crop and livestock opportunities to the farmer and thus increase the farm income and employment.

12.3 Development of ODOP :

One district one product is an initiative launched by Ministry of food processing industries that aims to help districts reach full potential and foster economic and socio- cultural growth. This also aims to create employment opportunities especially in the rural areas. ODOP of Gadag district is *'Byadagi Chillies'*. Bydagi chillies are known for its flavour colour and low pungency.

12.4 Convergence of Skill Training Programmes

Various skill training programs are conducted under different departments, such as training conducted in Power loom Training Centers through Karnataka State Textile Infra structure Development Corporation Limited and training programs under Department of Agriculture's ATMA programs. All these programs need to come under one wing to avoid duplicities and create an efficient platform for skilling ecosystem.

12.5 Promoting the Entrepreneurial Spirit of Gadag District

The focus of this action plan is on supporting enterprises to start up and grow and supporting job seekers in rural areas to access jobs. Increasing employment opportunities for people across all regions of the country is a key objective for the Government. Supporting the growth of enterprises at regional level – whether start- ups, scaling companies or FDI companies – will bring increased job opportunities for people who live in rural areas and will increase economic activity in rural areas.

One way to boost this action plan is to expand the scope of Centre for Entrepreneurship Development of Karnataka to rural taluks of the district. The District Skill Mission should ensure awareness of CEDoK's programs to all Gram Panchayats. This will foster a spirit of entrepreneurship in rural areas.

12.6 Empanelment of Industries and Industry Associations as Training Partners under Industry Linkage Cell

Karnataka Skill Development Corporation (formerly known as Karnataka Vocational Training and Skill Development Corporation) launched a new initiative called 'Industry Linkage Cell'. It aims to involve the industries and their associations into skill training. Industries can ensure quality training and absorb the same candidates for employment. The Industry Linkage Cell (ILC) works to strengthen the state's talent ecosystem's overall quality and relevance. Enabling and strengthening strong industrial links is one of the most important components in achieving the goal. These industry connections are intended to help trainees find better career opportunities and provide demand- driven industry-relevant training opportunities. Enabling these collaborative efforts between the KSDC and industry will, in the end, result in the bridge of the skill gap, the provision of on-demand trained manpower to companies, and better employment outcomes for the jobless young.

On this front, Gadag is a prime hub for Renewable Energy Sector for empaneling this initiative. The RE companies can train the youth of the district for setting up and maintenance of solar and wind power plants. This will mutually benefit the youth with sustainable employment and the companies with sustainable workforce.

12.7 Recognition of Prior Learning

In the absence of recognized qualifications, a large proportion of people face severe disadvantages in getting decent jobs, migrating to other regions and accessing further education, even though they might have the necessary knowledge and skills. The Recognition of Prior Learning (RPL) process can help these individuals acquire a formal qualification that matches their knowledge and skills, and thereby contribute to improving their employability, mobility, lifelong learning, social inclusion, and self- esteem.

This increased prospect for inclusion in the labour market is a win-win situation for all as employers are likewise able to access proof of skilled personnel and better match them with suitable jobs, while also increasing productivity. And governments are further able to have better assurances of increased competitiveness and economic growth, as well as social inclusion and equity.

Gadag District currently has no RPL programs implemented. Therefore, RPL program under Pradhan Mantra Kaushal Vikas Yojana (PMKVY) must be initiated in the district to recognise several uncertified skilled workforces. Potential institutions like RSETI, Krishi Vigyan Kendra, and Karnataka State Rural Development and Panchayat Raj University can be empaneled under the state's CMKKY scheme to conduct RPL programs.

12.8 Conduct District Aspirational Survey

Skill Development, Entrepreneurship and Livelihood Department of Gadag District should conduct a survey at Gram Panchayats to assess the aspirations of the youth. The survey will determine the skills required, and the jobs that are aspired. The survey will also determine the existing workers who are engaged in uncertified self-employment activities. The survey should be conducted taluk-wise and gram panchayat-wise to ensure grassroots aspirations. With the help of this survey, the district can map skilled and unskilled workforce which in turn will help make the rural Gadag District unemployment free.

12.9 Promotion of Apprenticeships Training

Apprenticeship training is a course of training in an industry or establishment, under a contract of apprenticeship which consists of - a) basic training component and b) on- the-job-training (OJT)/practical training at workplace. All establishments having work force (regular and contract employees) of 30 or more are mandated to undertake Apprenticeship Programs in a range from 2.5% -15% of its workforce (including direct contractual employees) every year. Therefore, Government of India launched the National Apprenticeship Promotion Scheme (NAPS) to provide financial support to establishments undertaking the apprenticeship training.

Under this scheme, the government supports the businesses in following ways ;

To support establishments, (especially MSMEs) to engage apprentices under the Apprentices Act and pay stipend to them as per prescribed rates wherein under NAPS 25% of prescribed stipend subject to a maximum of Rs.1500/- per month per apprentice is reimbursed to such establishments by the Government of India to engage apprentices.

To support the establishments, (especially MSMEs) who do not have in-house Basic Training Facilities - to set up such facilities in house or at a center outside its premises or to engage Training Partners to undertake the Basic Training activity on their behalf for fresher apprentices who need to undergo such Basic Training before joining the shop floor (on the job training) under the apprenticeship program.

On this front, the District Skill Development Office will conduct Apprenticeship Melas every month with the aim of connecting youth to more opportunities for on-ground training within corporates while furthering employment opportunities.

13. MONITORING & EVALUATION

- ✦ Conduction of periodical monitoring visits for quality assurance mechanism
- ✦ Evaluation programs on periodical basis with regard to the program effectiveness.
- ✦ Conduction of the assessments as per the industrial standards and Government Approval.
- ✦ Monitoring and feedback collection from the job placed employees to ensure the training effectiveness and sustainability.

- ✦ Conduction of tracer studies, pilot studies, follow up and evaluation studies to understand the effectiveness of the training, pupation of training program time to time based on industrial changing requirement.
- ✦ Awareness and knowledge sharing programs with the guidance in promoting entrepreneurship and livelihood programs with the support of NABARD, District Industries Centre and banking support system.

- ✦ Specialized and expert feedback system from the industry-oriented resource persons.
- ✦ Periodic studies over changing industrial trends in terms of job roles and skill sets and launching of new industry-oriented courses.
- ✦ Ensuring the organization wise policy in course implementation with the quality assurance.
- ✦ Preparation of evaluation reports based on performance.
- ✦ Utilizing the resources within the district to contribute to each in strengthening and capacity building of the organizations self and skill eco system of the district.
- ✦ Ensuring quality assuring mechanism and fed back system.
- ✦ Developing district skill development portal for data collection and maintenance.

Annual Work Plan

Initiative

To the primary initiative is to assess and fulfill the demand for skilled personnel, Enrolment & Counseling of Trainees, Monitoring of Training Activities, Promoting Self Employment Activities, DSC Capacity Building Activities in the district. This includes identifying key sectors with a demand for skilled labor, developing targeted training programs, and collaborating with local industries to ensure a steady supply of well-trained professionals. This initiative aims to bridge the skill gap, enhance employability, and contribute to the overall economic development of the district.

Categories of work plan:

- Demand for Skilled Personnel in the District
- Enrolment & Counseling of Trainees in the District
- Monitoring of Training Activities in the District
- Promoting Self Employment Activities in the District
- DSC Capacity Building Activities in the District

Key Activities

1. **Conduct a District-Wide Skill Demand Assessment**

Objective:

Identify the current and future demand for skilled personnel in various sectors within the district.

Activities:

- Survey local businesses and industries.
- Analyze employment trends and labor market data.
- Conduct focus group discussions with industry leaders and stakeholders.
- Survey unemployed youths in the District.

Timeline: Q2, 2024-25

2. Develop Sector-Specific Training Programs
Objective:

Design training programs tailored to the needs of key sectors identified in the demand assessment.

Activities:

- MOU with industry experts to develop curriculum.
- Identify and procure necessary training materials and equipment.
- Recruit qualified trainers and instructors.
- Identifying the demand job role on per needs.

Timeline: Q2, 2024-25

3. Establish Partnerships with Local Industries

Objective:

Forge strong partnerships with local businesses and industries to ensure training programs align with industry needs.

100% placement to given for trained students.

Activities:

- Host meetings and networking events with industry representatives.
- Draft and sign Memorandums of Understanding (MoUs) with key partners.
- Establish an advisory board comprising industry leaders.

Timeline: Q1-Q4, 2024-25

4. Implement Training Programs

Objective:

Deliver high-quality training programs to equip individuals with the skills required by local industries.

Activities:

- Schedule and conduct training sessions.
- Assess and certify trainees upon completion of the program
- Provide hands-on practical training and simulations.
- Assess and certify trainees upon completion of the program.

Timeline: Q1-Q4, 2024-25

5. Monitor and Evaluate Training Outcomes

Objective:

Ensure the effectiveness of training programs and make necessary improvements.

Activities:

- Track trainee progress and job placement rates
- Collect feedback from trainees and industry partners.
- Conduct periodic reviews and make adjustments to training programs.
- Biometric/ Adhar board attendance can be adopted.

Timeline: Ongoing

6. Organize Job Fairs and Placement Drives

Objective:

Facilitate employment opportunities for trainees by connecting them with potential employers.

Activities:

- Plan and organize job fairs and placement drives.
- Invite local businesses and industries to participate.
- Provide career counseling and resume preparation assistance to trainees.
- Apprentices engagement drive can also be done.

Timeline: Q4, 2024-25

7. Promote Awareness and Outreach Activities

- **Objective:**
  Raise awareness about the training programs and attract participants.

- Activities:
  - Launch a marketing campaign through local media and social media platforms.
  - Distribute promotional materials and brochures.
  - Conduct informational sessions in schools, colleges, and community centers.

- **Timeline:** Q1-Q4, 2024-25

Resource and Budget

Resource and Budget requirement of GADAG district

Sl. No.	Activity	Addition resources required (YES/NO)	Type of resources required (individual consultant or agency)	Number of resources required	Annual Tentative Budget Required (in INR)
1	Conducting surveys, developing and implementing training programs, organizing events, monitoring and evaluation and promotional activities	Yes	Consultant	1	6,00,000=00
2	Awareness on the various Schemes				
3	Creation of DSDP				
4	Monitoring of the TCs				
5	Feedback Mechanism				
6	Training Program Development & Implementation	Yes	Conducting workshops, meetings, programs etc, Branding and Logistics cost		14,00,000=00
7	Market Relevance action plan	No	DSC will be plan accordingly with the coordination of consultant		
8	Trainer Development Initiative	Yes	Sector Skill Council		Per trainer cost prescribed by SSC
9	Job Fairs, Placement Drives, Awareness & Outreach Activities	Yes	DSC will be plan accordingly with the coordination of consultant		10,00,000=00
		Total			**30,00,000=00**

14. CONCLUSION

The Gadag District Skill Development Plan is an elaborate document summing up the skill ecosystem of the district. It was prepared after several consultations with stakeholders, and reports from Gadag District at A Glance, District Industries Centre, District Potential Linked Credit Plan, Government of Karnataka, Invest Karnataka, District Profile, Visvesvaraya Trade Promotion Centre, Economic Survey of Karnataka, Brief Industrial Profile.

The focus of this District Skill Development Plan is to identify the existing strengths of the district and propose action plans to create a sustainable skill ecosystem. Promotion of native crafts, set up of centers of excellence, convergence of skill training programmes, and promoting the entrepreneurial spirit are some of the areas of interest determined by this report.

Gadag district has a workforce of 4.95 lakh persons, out of which 25.71 per cent are cultivators and 40% are agricultural labourers. Therefore, there is scope to promote different sectors to diversify the district economy and make it sustainable.

The Central and State government has taken several initiatives to identify the strengths of the district, like One District One Product (ODOP) and One District One Skill (ODOS). ODOP is an initiative launched by the Ministry of food processing industries that aims to help districts reach full potential and foster economic and social growth. It also aims to create employment opportunities especially in the rural areas. Karnataka Skill Development Corporation launched the One District One Skill initiative in Gadag District to promote native crafts. The *Koudi Making* craft is mainly practiced by women folk of the district.

The document also focuses on the emerging sectors of the district, like, food processing and renewable energy. Gadag District in Karnataka gets more than 310 sunshine days throughout the year and gets less than 700mm rainfall. This makes it a prime location for solar power projects. This potential of the district can be harnessed to meet the renewable energy goals of Karnataka and India.

Gadag district has four textile-based factories, employing about 1,500 workers. The people are well versed in the basic skills as this is a traditional sector. The plan identifies the past incremental demand and supply of human resources for high growth sectors in Gadag district between 2012 and 2022, to anticipate the future demand of workforce. Agriculture and allied activities are expected to remain the biggest employers. There are many potential investment opportunities in the district, especially in construction sector for the development of infrastructure like roads, highways, etc.

By and large, harnessing the demographic potential of the district, identifying their skills and imparting them with opportunities created within the district will transform Gadag District and make it sustainable.
