DISTRICT SKILL DEVELOPMENT PLAN
KOLAR

GOVERNMENT OF KARNATAKA
OFFICE OF THE DEPUTY COMMISSIONER, KOLAR DISTRICT, KOLAR
Skill Development, Entrepreneurship and Livelihood. District Skill Mission
DC Office Complex, 2nd Floor, Room No S-20, NH-75, Kumbarahalli
Kolar-563103

Email ID : dsdokolar@gmail.com
Ph No:08152-243545

Date: 05/08/2024

To,

Managing Director,
Karnataka Skill development corporation .
Koushalya bhavan,3rd floor,
Dairy Circle, Bannerghatta Road
Bangalore-29.

Dear Sir/Madam,

Subject: Submission of District Skill Development Plan (DSDP) Proposal for" Awards for Excellence in District Skill Development plan 2024-25 SANKALP programme".

Reference: Office letter NO:KSDC/SANKALP/DSDP/CR-05/2024-25 Dated:29/07/2024

---****---

With Reference to the above, we are submitting herewith District Skill Development Plan 2024-25 under "SANKALP programme" for consideration please.

Thanking you,

Your's faithfully,

Akram Pasha, IAS
Deputy Commissioner,
Kolar, District

DECLARATION

"This is to confirm that the plan has been prepared by the District and all data, information provided has been taken from the credible sources and referenced in the proposal".

05.08.2024

(Srinivasa K)
District Skill Development Officer
District Skill Mission
Kolar

District Counselor, Kolar

(MOHAN KUMAR SAKTHIVELU)

METHODOLOGY

This report is prepared in consultation with various stakeholders such as District Skill Development Department, District Industries Center, National Rural Livelihood Mission, National Urban Livelihood Mission, Center for Entrepreneurship Development of Karnataka, District Employment Exchange, Industrial Training Institutes, Polytechnics, Youth Employability Services - Kendra, Government Tool Room and Training Centre, Rural Self Employment Training Institute, Jan Shikshan Sansthan, Chamber of Commerce and Industries, Factories Owners Association, Rice Mill Owners Association and others too. With support from Officers of district administration this report was developed.

The data projected in this report is taken from the following references.

1. Brief Industrial Profile of Kolar District
2. District Wise Skill Gap Study for the State of Karnataka
3. Economic Survey Report – 2021-22 – Published by Government of Karnataka
4. DSDP Templates – Data Collected from MGN Fellow and District Counselor.
5. Proceedings of various district level and state level meetings attended
6. Kolar District At A Glance 2022-23 – Published by Statistical Department
7. Discussions with students, skill aspirants, VTP's, Trainers, resource persons and others.

The methodology followed to prepare this report was mainly experience driven and sample visit based field study. However consultation with various stakeholders has also given lot of inputs in developing the action plan.

Introduction

Kolar district is located in the southern region of the Karnataka State and happens to be the eastern most district of the Karnataka State. The district is surrounded by the districts of Bangalore Rural and Tumkur on the west; on the north, by Chikballapur District; on the east by Chittoor District of Andhra Pradesh; and on the south by Krishnagiri and Vellore of Tamil Nadu. The district comes under the Eastern Dry Zone (Zone-5) of the Agro climatic Zones of the state, with a total geographical area of 374916 ha which has hills, ridges and mounds, rolling lands, pediments, undulating and gently sloping lands and valleys.

History of Kolar

It was once known as Avantika- Kshetra, a sacred place in Kolar district in Karnataka State. It was famous for its religious establishments from ancient times. It was once known as Aavanya which was under the Ganga prince Madhava Muttarasa, who governed several districts. In about A.D 890, its earliest grant relates that Tribhuvana Kartara Deva, who held the title of Kali Yuga Rudra, ruled over the Avaniya Thana for 40 years. During this period he constructed 50 temples and two large tanks. Maharshi Valmiki, author of the epic Ramayana, lived here. The legend goes further to establish that Seetha Devi, after being sent to exile, gave birth to her twins Lava and Kusha at Avani. The Avani continued to survive as a religious establishment from the 9th to 11th centuries. There are temples dedicated to Lord Rama. Kolaramma Temple, Kolar, Antharagange

The hill to the west of Kolar, called the Shatasringa Parvata or 'Hundred-Peaked Mountain' is 'Antharagange', associated with the story of Parasurama and his fight with King Kartaviryarjuna over Surabhi, the divine cow. As the story goes, King Kartavirya Arjuna (Sahasrarjuna) and his army visited Jamadagni, Parasurama's father, when the king demanded the magical cow from Jamadagni. When Jamadagni refused, the King sent his soldiers to take the cow, but Parashurama killed the entire army and the king with his axe. In return, the princes beheaded Jamadagni. Thus, Parasurama took an oath to behead the entire Kshatriya race, which is said to have taken place on the hills. It is said that the 'kolahala' on the death of Kartaviryarjuna gave its name to the town, which later become Kolar. Kannada is the main languages spoken in the district of Kolar. Telugu is also spoken. Gangas built beautiful temple of Sri Uttameshwara temple in UttanurMulbagal Taluk.

	Total	Rural	Urban
SC share of Youth Population	31.14%	32.42%	28.43%
ST share of Youth Population	5.35%	7.14%	1.55%

According to the census 2011, the overall population of Kolar is 15,36,401, an increase of about 1.5 lakhs from previous one. Bangarpet along with KGF is the most populous taluk by having 29% of the district population and 534 people per square km. Kolar is the second highest populated taluk which constitutes 25% of the district population with 486 people per sq km. Mulbagal constitutes 17%, Malur 15%, Srinivaspur 13% of the district population. Srinivaspur being geographically the largest taluk in Kolar, has the least population in the district and has the lowest population density of 235 people per sq.km.

Decreasing trends in decadal growth rates. Between 2001 and 2011, the overall

population of the district increased from 13,87,062 to 15,36,401, a decadal population growth rate of 10.77%. The decadal rate of population growth decreased from 14.45% (1991- 2001) to 10.77% (2001-2011).

In 2011, 69% of Kolar district population lives in rural areas and the remaining 31% in the urban areas where as in 2001, 71% of total population lived in rural areas. The proportion of rural population in Kolar is higher than the average rural population proportion of the state (61.33% in 2011). The share of male and female population in the district is 51% and 49% respectively. According to census 2011, Sex-ratio (number of female population per 1000 male population) in Kolar district is 978.88 and is better than the state average (972) and the national average (943).

Literacy Rate

Table 04: Literacy Rate

Sl. No.	Taluks	Literacy rate								
		Rural			Urban			Total

1	**Bangarpet KGF**	104.39	94.67	99.53	95.56	104.73	100.14	99.97	99.97	99.83
2	**Kolar**	80.35	62.4	71.48	88.1	81.42	84.79	83.1	69.15	76.21
3	**Malur**	76.01	59.43	67.92	87.4	77.35	82.46	77.92	62.47	70.37

4	**Mulbagal**	77.74	58.48	68.17	84.48	74.13	79.35	79.22	61.89	70.61
5	**Srinivasapura**	79.03	59.93	69.54	87.47	78.04	82.83	80.15	62.29	71.29
District Total		**78.11**	**59.82**	**69.08**	**90.05**	**82.18**	**86.13**	**81.8**	**66.84**	**74.39**

Source: Census 2011

The literacy level of Kolar district is 74.39% as per 2011 census, out of which the male and women literacy levels are 81.8% and 66.83% respectively. The average literacy levels of the state is 75.60% out of which male and literacy levels is 82.85% and 68.13% respectively. While, at the national level the total literacy level is 74.04%, the male literacy level is 82.14% and women literacy level is at 65.46%. When the literacy level of Kolar district is compared to the State-level literacy level, it shows 1.21% less. The difference of literacy level among males is 1.05% and 1.3% among women. The literacy level of the district is 0.35% more than national average. It is 0.34% less among males and 1.37% more among women.

Further, over the period of 10 years there was just a 2% of raise in proportion of urban population in the district in comparison to the state level, where this proportion increased by 4.68%. Decadal increase in rural population of the district was 7.5% whereas it was 18.68% in the case of urban areas. The reasons for this large decadal growth rate in urban areas could be migration from rural to urban areas, migration from other states (since Kolar borders both Andhra Pradesh and Tamil Nadu).

The demography of the district shows that the majority of the population is concentrated in rural areas and SC and ST population proportions being higher in comparison to other social categories. The population structure of the district resembles that of the state, although the decreasing trends in population sex-ratio and child sex-ratio in the district have to be considered seriously, specifically Malur and Srinivaspur show alarming trends.

Labour Market Profile:

Table 05: Work participation rate in kolar district and state in %

Particulars	**Kolar**	**Karnataka**
Work participation rate	52.22	45.62

Percentage of total workers within total population	52.63	38.27
Percentage of marginal workers within total population	18.56	16.00
Percentage of agricultural labourers within total workers	28.03	25.67
Percentage of homebased industries within total workers	3.36	3.28
Percentage of other workers within total workers	43.10	47.44

Reference: HRD Report

The table shows that work participation rate and % of total workers in Kolar is higher in proportion than the state average. Further, the values of many other employment related variables (like share of marginal workers, agricultural labourers, home based industries etc) in the district are comparable to that of the state.

The district has registered a work participation of 52.22%. The work participation rates for Male and Female population are 58.5% and 34.7% respectively. Among the total workers in the district 81.4 % are Main workers and 18.6 % are Marginal workers.

Among the total workers 53.5% are engaged in Agricultural sector I.e. Cultivators(25.5%) and Agricultural labourers(28%). 53.3% of the total population in the district is non workers.

Table 06. Trends in main and marginal workers in Kolar (%)

Kolar	Male Workers				Female Workers				Total			
	Main		Marginal		Main		Marginal		Main		Marginal	
	2001	2011	2001	2011	2001	2011	2001	2011	2001	2011	2001	2011
Rural	85.42	90.11	14.58	9.89	69.99	67.15	30.01	32.85	79.14	80.21	20.86	19.79
Urban	90.28	94.34	9.72	5.66	83.63	81.86	16.37	18.14	88.65	91.62	11.35	8.38

Total	86.81	91.04	13.19	8.96	72.17	68.54	27.83	31.46	81.43	82.16	18.57	17.84

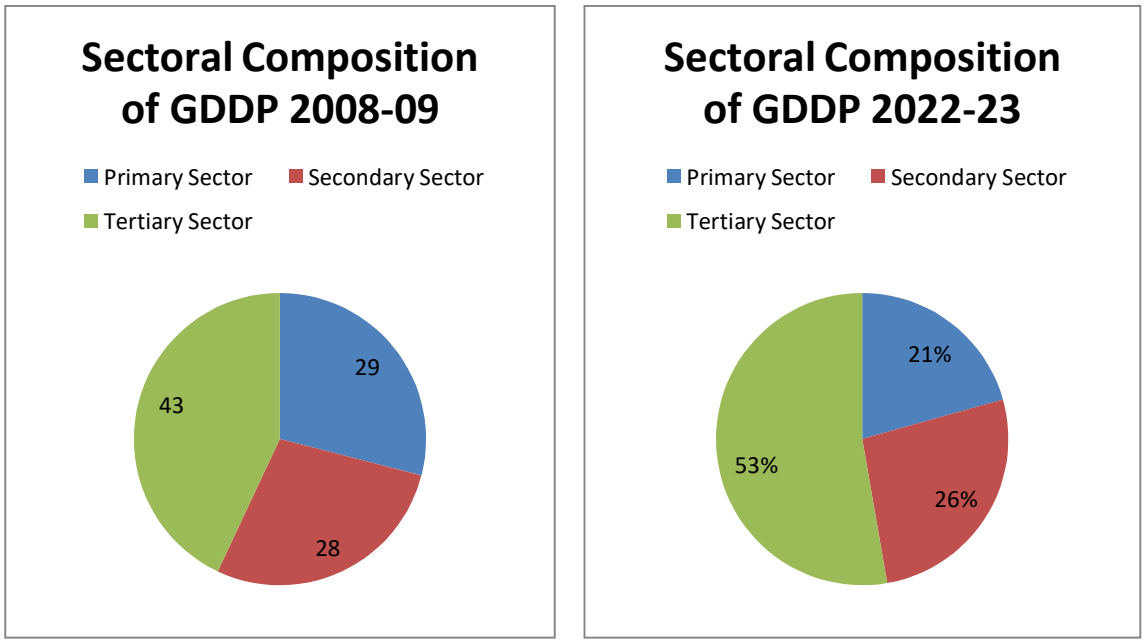

Source: Census 2001, 2011

It shows that the share of male main workers in Kolar increased both in urban and rural areas in Kolar, reaching more than 91% in 2011 with corresponding decreases in marginal workers. However, in both urban and rural areas, female main workers reduced in proportion to marginal workers. Thus, on the overall, marginal workers in rural Kolar are higher in proportion than in urban areas. Further, in urban areas, proportion of marginal workers has decreased by 3 percentage points, indicating higher full time employment opportunities in urban areas for male workers than in rural areas of the district.

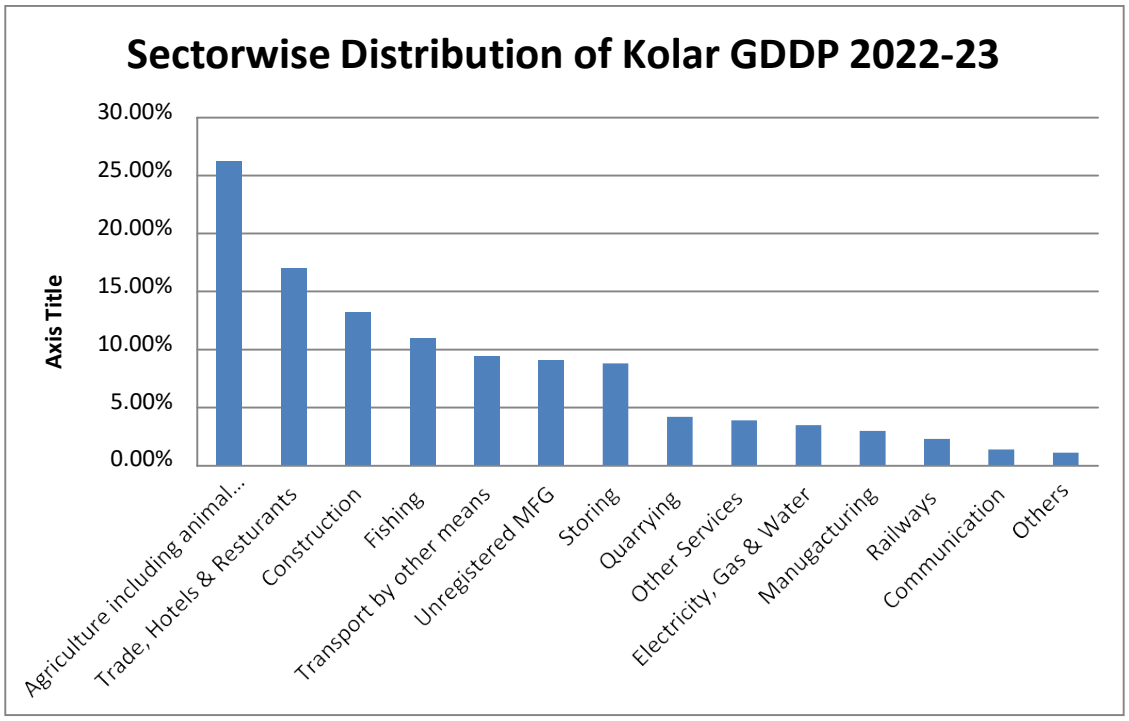

Economic Profile

Kolar was a region with its economy equally based on all three sectors of the economy in 2008. Starting from agriculture, horticulture, animal husbandry, mining, manufacturing and service. The district's economy was been called as a balanced one in 2008-09. But with a decade progression, the economy is tilted towards tertiary sector with a contribution of almost 53%.

Sectorwise distribution of Gross District Domestic Product, Kolar

Source: Economic Survey

Primary Sector

Table 07: Primary Sector Contribution Talukwise

Taluk	Agriculture including Animal Husbandry	Forestry and Logging	Fishing	Mining and Quarrying	Total
Srinivaspura	5.80	11.06	-1.61	44.04	6.12
Kolar	-3.56	13.81	19.61	43.96	-2.01
Malur	-7.29	12.32	8.91	44.19	-5.42
Bangarpet	-5.87	9.84	22.41	43.75	-4.21
Mulbagal	1.68	12.78	22.31	43.75	2.62
Total	3.43	12.07	17.19	43.96	4.27

Source: HRD Report 2014

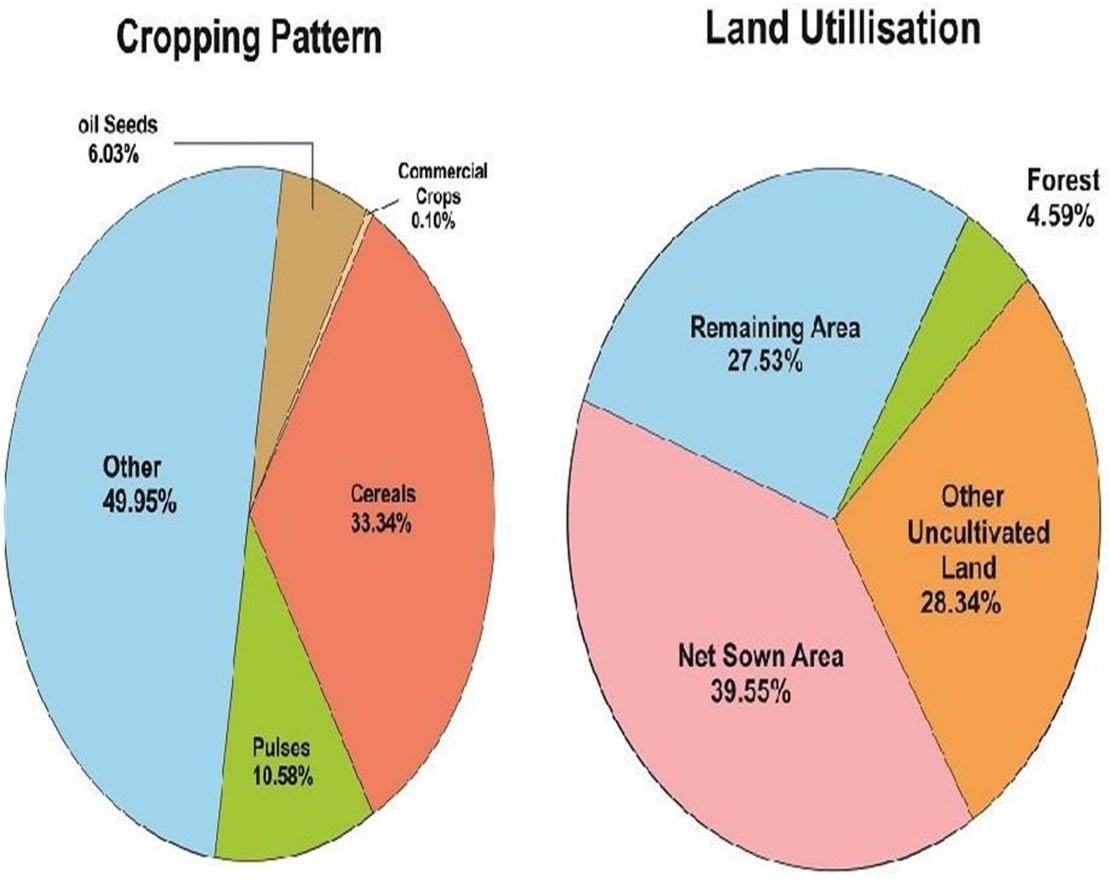

The economy of Kolar, like many other districts of the state is heavily dependent on agriculture and allied sectors, although the contribution of these sectors to the overall gross district domestic product (GDDP) is occupies third position after tertiary and secondary sector. Cultivators and agricultural laborer's together form 64% of the total work-force in the Kolar economy. The primary sector, which includes agriculture, its allied activities (like

animal husbandry, apiculture, fishing, sericulture) and activities like mining and forestry contributes to 21% of the GDDP, whereas the tertiary sector's share of the contributes 53%.

The district recorded a meager of 3.43% of growth since last 5 years. Forestry and logging has witnessed a growth of 12% while fishing is gaining momentum across the taluks except Srinivaspura taluk where water resources for fish farming are very limited. Optimistic growth rates were noticed in the income generated because of mining and quarrying.

Agriculture & Horticulture

Kolar with its top rank in productivity and yields of horticulture crop has 49.95% of the net sown land under its cultivation. The district allots 33.34% for cereals and 10.58% for pulses. The horticulture crops in the region include Potato, Tomato, Onion, Beans, Green chilies, Khol crops, Carrot, Radish and Beetroot, Mango, Banana, Guava, Sapota, Grapes, Marigold, Jasmine, Chrysanthemum and Rose. District average of milk production is 7.65 litres/day as compared to state average of 5.83 litres/day. Cocoon productivity in Kolar is 900 kg/ha, this is higher than the state average of 601 kg/ha.

Category	Major crops
Food crops	Maize, Ragi, Rice ,Tur, Horse gram, Green gram, Groundnut, and Mustard
Horticulture crops	Potato, Tomato, Onion, Beans, Green chillies, Khol crops, Carrot, Radish, Beetroot, Mango, Banana, Guava, Sapota, Grapes, Marigold, Jasmine, Chrysanthamum and Rose
Cash crops	Sugarcane and Cashew

Source: Department of Agriculture and Production

As per 9th agricultural census data done during the year 2010-11, there are a total of 236855 agriculture landholders in the district cultivating in a total of 233922.91 hectares of

agriculture land in the district, with the average land holding size of about 1 ha per land holder. Majority of the farming community in the district is marginal landholders (67.18%) and very small portion of medium and large farmers (2.82% together). The interesting point here is to observe that this meager percentage of large and medium farmers hold about 17.5% of the cultivated area while high number of marginal farmers hold 28.8% of the total area. Small and marginal farmers together constitute 88.01% of the total landholders who own a total of 57.85% of the area

Srinvaspur taluk is well known for the cultivation of mangoes with 63 varieties of the fruit being produced in the taluk. It stands first in mango production in Karnataka State. Mangoes are marketed throughout India and few varieties are exported as well. Srinivaspur is hence called as Mango capital of Karnataka.

Horticulture in Kolar is predominantly focussed on commercial cultivation of fruits, vegetables and sericulture, mostly driven by manual labour. Major fruit crops in the district are Mango, Banana, Sapota, Papaya, Cashew and Grapes. The total annual mango production in the district was about 4.86 metric tonnes. Major vegetables grown in the district are: Tomato, Potato, Brinjal, Green Chilly, Beans and leafy vegetables.

Animal Husbandry

Traditionally, the district is famous for its milk production as well. Approximately, 2.5 lakh cattle, 4.6 lakh sheep and goats and 3.1 lakh poultry are reared in the district (based on Livestock Census of 2007) making animal husbandry a major allied livelihood opportunity in the district.

Milk production in the district is principally driven by Co-operative societies, with approximately 2.4 lakh members registered in co-operative societies with a reported annual production of 750 million litres of milk (District Statistics at a Glance, 2011).

Agriculture is the major land use driver of Kolar and is the primary occupation of the majority of the people in the district. However, due to lack of surface irrigation facilities, farming in the district is dependent on monsoons and ground water to a large extent. With intensive commercial agricultural activities, the pressure on ground water extraction is enormous in the district resulting in severe loss of ground water table and water depletion. pressure on ground water extraction is enormous in the district resulting in severe loss of ground water table and water depletion. An Operational Food park at Melur across 87 acres comprising of commercial complex, incubation centre, testing laboratory, water treatment plant, common effluent treatment plant, warehousing, cold storage and generator. Expansion of Mulberry cultivated area and introduction of varieties like V1 and S36 has boosted production and yield. Kolar has a horticulture college to improve knowledge and provide support to horticultural farmers

Secondary Sector

Secondary Sector in Kolar contributes about 26% to GDDP with large amount of contribution from construction sector and almost second equal contribution from

Manufacturing and Electricity, Gas and Water Supply. There is significant presence of Reputed companies in Kolar i.e. Honda, BHEL, WISTRON, AISIN etc. But most of them are concentrated on few areas, mainly in Narsapur because of its proximity to Bengaluru International Airport. There is a need to redistribute the upcoming industries equally with each taluks to stop the migration from rural to urban areas.

20	M/s Tega McNally Minerals Plot No.313, Survey No.72&76, 3rd Phase, Malur Industrial Area	Minerals processing
21	TATA Electronics Systems Solution Private Limited, Achchathanahalli Village, Narasapur	Electronic manufacturing services(EMS)
22	INDO Autotech Limited Unit-V, Plot No : 176P, 177P, 178P, 179-181, Narasapura	Sheet metal components(SMC)
23	Associate Décor Limited, Plot No.1, KAIDB Industrial Area, Malur Taluk	Manufacturing of particle boards, high pressure laminated sheets
24	ITC Limited, FOODS Division, No.61, Yashwanthpura Village, Kasaba Hobali, Malur Taluk	Manufacturing of noodles ,pasta and vermicelli

Kolar has the biggest solar power unit in India with a 3MW capacity. These new resource exploitations for growth have led this well-connected district to look around for opportunity. The close connectivity to its neighbouring states is expected to add impetus for a thriving auto and aerospace sector here. A 600 acre of Industrial Township is earmarked for its development with the state government envisaging an auto zone. The Mahindra Aerospace 4, 10 and 20 seater aircraft manufacturing facility is the first step in this regard. The 2109.88 acres of the land bank, proposed free trade warehousing zone with huge investments is sure to add potency to growth here. The 5 industrial area and 5 industrial estates cater to 5 large and medium scale industries and the 8138 MSME. A dedicated apparel zone planned by Suvarna Karnataka Development Corridor coupled with a handloom cluster and readymade garment cluster, along with a dyeing and printing silk cluster in the district adds vibrancy to the sector here.

Tertiary Sector

Tertiary Sector contributes around 53% for GDDP for the year 2018-19. It was contributing around 43% a decade ago. Among the different sub-sectors in the tertiary sector in Kolar district, there is no revenue from railways in the taluks of Mulbagal and Srinivaspur during 2004- 05 to 2008-09 as the taluks lacked railway lines. Transportation by other means recorded progressive growth rates in all taluks, Mulbagal with highest of 21.01% and Bangarpet with lowest of 15.69%. Communication sector irrespective of the taluks grew at 8.96% in the district. The growth of public administration was negative of -2.30% in all the taluks. This growth indicates the saturation of employment creation in public sector in the district. This is depressing in terms of economic growth and livelihood generation in the district.

Taluk wise look at the growth of the tertiary sector showed that there was great variation in growth rates of the sector among the taluks, Kolar taluk witnessing the highest growth rate of 11.95% and Srinivaspur the least (5.17%). Among the sub-sectors of the tertiary sector, other services which include service in the field of health and education grew fastest (10.68%) in the district. This is an outcome of establishment of various education institutes (2 Engineering colleges, 1 Medical college, 1 Dental college and 8 Polytechnic colleges) and multi-specialty hospitals in the district under the study period.

The real estates, ownership of dwelling & business services grew at high rates in the district (14.0%) irrespective of the taluks. This is due to the increasing demand for land in the district for industrial purpose (setup of manufacturing units).Trade, hotels & restaurants and banking & insurance subsectors recorded high variations in the district- Kolar district with highest of 24.28%

Education Profile

Based on the data available for the school enrolments, there is a consistency in the students from Class 5 to 11 with about 12% dropout and class 10. There is a significant drop from Class 11 to Class 12 which goes up to14%, which is a significant number. This is the population to be targeted for the skill training as they are entering the employment sphere of the population. There is a need to address their livelihoods need through mobilization and counseling.

Table 11: Population of the students from Class 5 to Class 12

	For year 2021-22			For year 2022-2023			Dropout analysis	Percentage of Dropouts
Education level	M	F	Total	M	F	Total		
Class 1 to 5	54535	50305	1048840	24486	25984	50470	276	0.17%
Class 6 to 8	34291	32214	66505	34740	32555	67295	276	0.17%
Class 9 to 10	21313	20246	41559	22935	21917	44852	0	0

Class 11 to 12	6113	7059	13172	9238	10994	20232	0	0
						Total Dropout in 2021-22	276

Source: District at a glance 2022-23

Industrial Training Institute

There are 7 Government ITI's and 28 private ITI's in the district with skilling the students in totally 96 trades. Important trades are Fitter, Electronics Mechanic, Electrician, Computer Operator and Programming Assistants, Refrigeration and Air-conditioning, Turner, Motor Mechanic, Tool and Die making, Dress making and Welder. There is a total enrolment of 6783 students in all the ITI's.

GOVERNMENT TOOL ROOM AND TRAINING CENTRE (GTTC)

Government tool room and training Centre (GTTC), Kolar is a Government institute established by the government of karnataka in 1995

Important trades in GTTC, Kolar are (1) Diploma in tool and die making, (2) Diploma in precision manufacturing, (3) Diploma in electrical and electronics engineering. In 2023-24 171 students trained in GTTC, Kolar.

Students Enrolment

Table 14: Number of Admissions for Boys and Girls

Courses	Boys	Girls
Lower Primary	24486	25984
Higher Primary	34740	32555
High School	22935	21917
Pre University	9238	10994
General Degree	3386	4517
Engineering	1081	904
Medical	149	278

From the above table we can see that enrolment of boys and girls to the Primary, higher primary and high school are at par with each other. There is slight increase in the enrolment of girls to the Pre University and General Degree colleges with respect to the boys. This shows that more number of girls are able to complete their education with a degree compared to boys where 50470 admissions into primary, only 7903 are able to complete the degree. These shows that because of low economic background, Boys are put into labour intensive jobs as soon as they complete high school and ITI.

But there is a divergence in the trend in STEM careers, where 1081 boys are pursuing engineering compared to 904 girls. Because of low employment potential in the district and

restriction of home that not to go out of the district for job are restricting the girls choices on higher education.

- Women participation in the STEM should be encouraged from primary school rather than only in higher studies
- Behavioural changes, highlighting the contribution of women in STEM sector in textbooks;

the goal must be not merely to increase female labour force participation, but to reduce overall mindset and gender gap.

Employment Potential

Table 15: Employment Potential

SECTOR	Incremental Demand - 2012 To 2023				
	Total	Minimally Skilled	Semi-Skilled	Skilled	Highly Skilled
Agriculture and allied	94,227	78,478	11,730	2,134	1,885

Unorganised	4,714	943	2,734	943	94
Total	**186,757**	**92,713**	**51,224**	**33,792**	**9,029**

District Skill Committee

In order to get to the grass roots of the country with its various reforms and empower every citizen, the ministry has formed District Skill Committees (DSC) in all Districts as part of its Aspirational Skilling Abhiyaan under the Sankalp program, which is funded by World Bank. Its focus is on district-level skilling ecosystem through convergence and coordination.

District Skill Committee members to develop a Vision and Mission Statement for the work they intend to do to improve the skill ecosystem.

Members of District Skill Committee:

- **District Collectorate** - Chairperson
- **CEO, Zilla Panchayat** - Co-Chairperson
- **District Skill Development Officer** - Member
- **Joint Director, District Industrial Centre** - Member
- **Social Welfare Development Officer** - Member
- **Joint Director: Agriculture Department** - Member
- **Deputy Director: Horticulture Department** - Member
- **District Officer of Socially, Economically and Marginally Backward Department-** Member
- **Deputy Director of Public Instruction** - Member
- **Deputy Director of Pre University** - Member
- **District Officer for Labour and Welfare Department** - Member
- **District Officer for Industrial and Boiler Department** - Member
- **Planning Officer, District Development Department** - Member
- **Principal, ITI College Kolar**
- **Lead Bank Manager in the District** - Member
- **Commissioners of Municipal Council** - Member
- **Executive Officers, Town Municipal Council** - Member
- **Two Members from Industrial Sector** - Member
- **Two Members from Training Centre** - Member
- **District Employment Officer** - Member
- **Planning Officer, District Rural Development Agency** - Member

Functions of District Skill Committee

- **Planning:** Each district tasked with developing an annual district skill development plan that outlines the employment opportunities available in the district as well as the skill required to pursue them.
- **Implementation:** Ensuring appropriate individuals are mobilized for various skilling related schemes such as PMKVY, DDU-GKY etc and they are expected to collaborate with governmental and non-governmental groups to complete this duty.

- **Funding:** As of now, DSC in itself does not have any financial powers. However, the member of DSC may have access to local area development funds which can be used for skill development projects.
- **Monitoring and Evaluation:** Involved in the monitoring and evaluation of all skill development institutions. Periodic inspection of infrastructure and machinery at various vocational training providers that are involved in federal and state government programs.

Sub Committees in District:

Mobilization and Counseling

- Project Director, District Urban Development Cell - Chairman
- Deputy Secretary (Development, Zilla Panchayat) - Co-Chairman
- Commissioners and Chief Officers of all ULBs - Members
- Taluk Panchayat Executive Officers - Member
- Mission Manager, NULM - Member
- Principal District Cluster College - Member
- District Youth Co-ordinator Nehru Yuva Kendra - Member

Training Quality

- Joint Director, Department of Collegiate, education - Chairman
- Deputy Director, Department of Pre-University Education - Member
- Principal, GTTC - Member
- Principal, Government Polytechnic - Member
- CMKKY/PMKKVY Training Centre Representative - Member

Industry Interface

- Joint Director, District Industries Centre - Chairman
- District Labour Officer - Member
- President, District Chamber of Commerce & Industries - Member
- President, Industrial Area Association - Member
- Job Development Executive, Youth Employability Services, Kendra - Member
- District Counselor, SANKALP, Programme - Member
- CMKKY/PMKVY training Center Representative - Member

Self Employment

- Lead Bank Manager - Chairman
- Director Rural Self Employment Training Institute - Member
- Deputy Director, Department of Handlooms & Textiles - Member
- Assistant Director, Department of Tourism - Member
- Center for Entrepreneurship Development(CEDOK) Representative - Member

Sub-Committee on Gram Panchayat Coordination

- Deputy Secretary, Zilla Panchayat - Chairman
- Executive Officer - Member

Agriculture

- Joint Director, Department of Agriculture - Chairman
- Deputy Director, Department of Animal Husbandry & Veterinary Science- Member
- Senior Deputy Director, Department of Fisheries - Member
- Deputy Director, Department of Horticulture - Member
- Head & Senior, Scientist, Krishi Vigyan Kendra - Member

Capacity Building

- Deputy Director, Social Welfare - Chairman
- District Tribal Welfare Officer - Member
- District Officer, Department of Minority Welfare - Member
- District Disabled Welfare Officer - Member
- Deputy Director, Department of women and child welfare - Member
- Principal, Government Nodal ITI - Member

MIS and Monitoring and Convergence

- District Skill Development Officer - Chairman
- NIC Representative - Member
- Assistant Director, District Skill Development Office - Member
- Assistant Statistical Officer, District Skill Development Office - Member
- Mahatma Gandhi National Fellow - Member

The District Skill Committee is an evolving body. It is an ambitious concept driven by the approach of decentralization and convergence to achieve efficiency and innovation in skill development. It is really important to identify points of convergence because skill development cannot be looked at in isolation. Once these convergence points are identified, districts need implementable policies, backed with strong strategic steps and realistic timelines to bring a gradual change on the ground.

All skill development scheme targets are allotted by the Central or State Government and funding is given directly to Training Partners, leaving the District Skill Committee with limited scope for new interventions and no financial powers. (Top-to-Bottom)

However, the District Skill Committees have to submit annual plans to the Ministry of Skill Development and Entrepreneurship. Implementation of these plans with no extra manpower and resources is often challenging at the district level. Skill Development can be taken as an agenda under the Good Governance Index (H.R.D. Sector).

- The District Skill Committee can consciously integrate inclusive programs in the D.S.D.P. and encourage training providers to be more inclusive.
- Convergence with line departments that work with women, children, persons with disabilities, scheduled castes, tribes, and remote rural areas would help in

mobilizing and being more inclusive.

- Create mobile Solutions for Rural Areas (Like Kaushalya Rath or Skills on Wheels bus) and Technological/Online Solutions for Urban Areas (remote learning and online modules).

Skilling intervention

Based on our field surveys in Kolar district, we have found out that sectors where skilling interventions are required are mainly agriculture and allied, textiles and clothing, auto and auto component and dairy processing. In addition, the district also has other manufacturing and engineering industries, which do not have significant employment generation potential, but are facing shortage of skilled manpower for functional skills such as fitting, electrical, welding, metallurgy, masonry etc. These trades also need to be offered to the youth.

High Growth Sectors identified by NSDC	Kolar	Karnataka
Construction Materials and Building Hardware		
Education and Skill Development Services		
Electronics and IT hardware		
Food Processing		
Furniture and Furnishings		
Gems and Jewellery		
Healthcare Services		
IT & ITES		
Leather and Leather goods		
Media and Entertainment		
Organized Retail		
Textile and Clothing		
Transportation, Logistics, Warehousing and Packaging		
Tourism, Travel, Hospitality & Trade		
Unorganized sector		
Auto mobile based sector		
Tata Electronics		

Skill Gaps:

Textiles and apparel:

Role, Educational qualification	Expected Competency	Skill Gaps
Manager/Supervisor/floor in-charge (Graduate)	Managing all the facilities and the functioning of the work-force.	Most of the managerial / supervisory staff is hired from Bangalore, as people with such skills are in scarcity in Kolar district. Those who are
	Supervising of the work conducted by operators / tailors and Conducting quality checks.	

	Knowledge of pattern making.	educated with these skills in the district prefer to move to Bangalore in search of better jobs.
	Ability to undertake inspection, production planning and control.	
	In-depth knowledge of production processes and inspection methods.	
	Leadership skills	
Operators / tailors (illiterate to 10th pass, trained in tailoring from NGOs or training provided by Department of Textiles)	Tailors are classified into five categories based on their skill level. Higher skills mainly obtained from experience in the industry.	On the job training provided for one week, on joining of job to explain requirements and basic skill-up gradation.
	Proficiency in tailoring / stitching is required for stitching garments with different specifications.	
	Good machine control – knowledge of threading of sewing machine, stitching on different shapes, seaming garment components together in various fabrics to specified quality standard	
	Knowledge of machine maintenance procedures	
	Knowledge of pattern making, grading and draping	Even those who are trained before the job have to be re-trained, especially on running of machines, as the training institutes do not have good machine infrastructure
	Ability to understand instructions properly and stitch the garments based on them.	
	Ability to work in teams / inter-personal skills.	
Quality control executive (Graduate and with some experience in garment industry)	Ability to inspect if the garments have been stitched as per given specifications and instructions	On-the job training provided as such skills are lacking in persons trained at training institutes and usually come from experience only.
	Ability to check for quality adherence	
	Ability to understand and prevent defects like size variations, loose threads, stains etc.	

Dairy Industry

Role, Educational qualification	Expected Competency	Skill Gaps
Processing entrepreneur (diploma/degree holder in processing	Give the formulations for the products	Less number of dairy experts
	Handle large scale processing	Lack of micro biologists who can understand the various bacteria related
	Come up with products with variations in composition, flavour,	
Marketing and	Ability to identify suitable	Less marketing and dairy

distribution(management degree)	segments for marketing of products	management graduates who come forward
	Ability to identify new target for the product development initiative	In those who are involved, they are not able to form the channels
	Ability to build a strong marketing	
	channel for forward linkage	

Agro Processing

Role, educational	Expected competency	Skill gaps
Farmers (unqualified)	Knowledge of cropping pattern Knowledge of the usage of pesticides and fertilizers in the right quantity	Very little awareness in farmers on the benefits of horticulture Prefer to sell the produce in local markets than to a food processing
Processing entrepreneur (diploma /degree holder in processing	Ability to understand the quality aspect Ability to train the helpers on how to grade the fruits Ability to find market for the final product Ability to expand the business Knowledge of preservation techniques	The entrepreneurs understand the business. There is no gap as such as the industry by itself is in a nascent state
Formulation experts (degree	Ability to create formulations for the product portfolio of the processing entity	No formulation experts in Kolar. All are hired from
Helpers / machinery attendants (High	Ability to help operators with their day to day functions Help in cleaning the machines Help in loading and un-loading	Lack the discipline to come and put in the required hours of work

Auto Component

Role,	Expected competency	Skill gaps
Engineers (electrical, mechanical, auto)	Knowledge of machinery and tools Ability to trouble shoot Shop floor management Compliance to quality measures like six sigma Soft skills	Not able to adapt to the latest technology quickly Lack the soft skills – in terms of report writing, documentation of faults, etc The district's education system is not able to produce enough engineers
Supervisors (Diploma in electrical, auto, mechanical, ITI qualified)	Ability to supervise activities conducted in the department for which responsibility is entrusted. Ability to train the new comers Overseeing the safety of all workers Complete understanding of all safety regulations and ability to handle safety issues Give the specifications to the operators and welders/fitters	Not able to adapt to the latest technology used in shop floor Not enough mechanical and electrical diploma holders available
Fitters (experience based), Welders, machinists, lathe operators	Basic ability to handle the machines Understand the basic safety aspects Do the given module of the assembly line to them to the specifications	Not able to adapt to the latest technology used in shop floor Less number of fitters, which forces the managers to recruit from outside Lack the discipline to come and put in the

Short Term Skilling Programmes:

Kolar district has 05 number of Short-Term training centres under CMKKY and 01 numbers of training centres under PMKVY

Major Skilling programmes

Table 16: Major Skilling programmes

Sl. No	Name of the schemes	No. of Affiliated Centres	No. of sectors covered	No. of job roles covered	Total annual intake	Funded Central/ State Funded
1	Chief Minister's Kaushalya Karnataka Yojane (CMKKY) (2022-23)	5	3	7	570	State
2	Pradhan Mantri Kushal Vikas Yojana. (2023-24)	1	1	3	278	Central

Proposed Action Plan

Revival of Traditional Crafts

India is a land of unity in diversity. The same is applicable in-terms of its rich diverse traditional arts and crafts. The ancestral heritage in-terms of art and craft must be preserved. There are lot of such extinct and endangering art and crafts. The main stream skill training has made these skills irrelevant to the present scenario. But there are efforts in identifying such traditional crafts in consultation with field experts and local resource persons. The Karnataka Skill Development Corporation has also given special emphasis in sustaining and focusing on such skills too. In this light the skill department is planning to encourage the following traditional crafts.

i. Stone Carving and Sculpting- identified under One District One Skill.
ii. Silk Weaving and Silk Rearing.

Indian traditional crafts have both national and international markets. Thus once training is initiated there shall be market connects also to be focused on.

Skill Fairs And Job Fairs At Block Level

Earlier job fairs and skill fairs were conducted at district level. Now it is planned to conduct Skill Fairs and Job Fairs at block level and institutional levels. These moves shall enable the aspirants to gain the best skills and get jobs accordingly. Also the recruiting companies focusing a particular target group will be benefitted. Separate action plan is made to serve this purpose. It is aimed to conduct focused job fairs for graduates of different disciplines. Similarly separate job fairs for ITI graduates, Diploma holders, Engineering Graduates, Teaching jobs and many more areas. It is also aimed to conduct job fairs exclusively for specially abled candidates.

Modern Job Roles in the District

As the industrial revolution 4.0 is in progress, the needs of the industries also have gone through lot of changes. With majorly Automotive and Automobile industries, Agro Processing industries and Chemical industries in the district, the requirement of new modern job roles is the need of an hour. Below job roles introduction will help to serve the industrial requirement in the district.

1) CNC Operator	2) Painting Supervisor	3) Agri Research Analyst
4) Computer Aided Engineering- Test Executive	5) Export Assistant	6) Tractor Operator
7) Automotive Body Painting Technical Level 3	8) Fashion Designer	9) Quality Seed Grower

Strengths		Weaknesses	
Sl. No	**Top 5 strengths of the District**	**Sl. No**	**Top 5 Weaknesses of the District**
1	Agriculture Industry	1	5 blocks or taluks do not have Skill training institutes
2	Apparel Industry	2	Low awareness among the youth about skill training
3	Good number of Higher Technical institutions	3	Very few Trained trainers in skill training
4	Famous Tourist places	4	Traditional institutions not providing Skill training
5	Strong base for Cash crops	5	Power cuts impacts industry production
Opportunities		**Threats**	
Sl. No	**Top 5 opportunities for the District**	**Sl. No**	**Top 5 threats for the District**
1	Agri entrepreneurship in Post-Harvest infrastructure	1	Youth attracted to Hyderabad / Bengaluru
2	Flourishing Tourism and Hospitality Industry	2	Lack of skilled manpower discourages new industry development
3	Cold storage industries	3	Training institutes in Kolar lack sophisticated machinery and infrastructure for training. Practical exposure is limited
4	Large number of SSI in Manufacturing	4	Preference for white collar jobs as compared to blue collar and manual jobs.

Convergence of All Skill Schemes

As part of the convergence NULM, NRLM, GTTC, ITI, CEDOK, YES SEVA KENDRA are all coordinating with the District Skill Development Officer for bringing skill development under one platform. Thus the department are expected to mobilize, create awareness, create action plan and execute in coordination with each other. This is more an advantage in addressing the lack of staff in gram panchayat level, taluk level and district level.

There was a District Skill Committee meeting conducted on 18th of Jul 2023. Henceforth since all departments need to work in coordination with each other every department heads/representatives were given an opportunity to explain about their respective schemes and program structures presently functional. This paved way in understanding each other departments better. The way forward topics such as collective mobilization, addressing staff unavailability, potential sectors, consolidated action plan and implementation are being worked out accordingly. Immediate requirements like stand for awareness cum display and schemes details in prescribed format were requested to be provided by each department. The outcomes were also presented which would be the result of collective and coordinated efforts of all through this convergence. Many collective and coordinated efforts are to be made way forward for holistic development.

Assessment

Kolar which was very active from Ancient times(Lava Kusha stories), medival period(battleground for Chalukyas and Cholas) to the recent past like Gold Mines, now contributes only about 1.69% of Karnataka's Gross Domestic Product and placed itself on 17th place on district wise net per capita income in Karnataka. Kolar which had a balanced economy over a decade ago in 2008 has now slipped into more than 50 percent contribution from service sector as the trend Country wide. Kolar which was previously called as Gold city due to the existence of Gold mines in KGF has been closed now due to loss in operation feasibility, left lot of them unemployed, now the area at the verge of becoming dust bowl. And with lack of big local industries, causing enormous migration of skilled workers from Kolar to nearby cities like Bengaluru, Ananthpur etc.

Kolar has enormous potential in Primary Sectors with more than 50% contribution from horticulture products in agriculture sector and ranked first in Karnataka. District average of milk production is 7.65 litres/day as compared to state average of 5.83 litres/day. Cocoon productivity in Kolar is 900 kg/ha, this is higher than the state average of 601 kg/ha. The city is rightly called as Kolar- The City of Silk and Milk. Kolar has untapped potential in tourism sector which has everything it needs like Heritage Monuments, Ancient Sites, Adventurous trekking- Mountaineering etc.

Kolar should focus on the sectors of auto, textiles and food processing. The food processing sector includes dairy and agro based processing. Some of these sectors will have recommendations for the private sector which will directly translate to skills being developed and the others will need government intervention to facilitate improvements. Finally, since a significant chunk of employment is concentrated in agriculture, thus, major up-skilling can be done for those workers, updating them of latest techniques of farming. This will help them improve their livelihood opportunities and will increase their income levels. More fruit-processing units can be established in the district. Especially, in the Srinivasapura taluka, there is extensive mango production, as discussed previously. These are, largely, sold in local markets. There is also wastage when these fruits are not sold. If fruit processing units are established in the district, there can be value addition done. Coupled with marketing and packaging, this will give rise to more employment and give better value for money for the farmers. Majority of the training programmes can be conducted in partnership with the auto companies itself because of significant presence of these companies like Honda, Scania etc in the district. The Toyota group in some district conducts courses for its own captive requirement. On similar lines, training initiatives can be developed for the requirement in Kolar according to the captive industry requirements. This will reflect the market demands better.

Different Departments of the Government should work in tandem to bring back the old glory to the kolar with large investment in future generation project like Solar Power Generation, Wind Mill Generation, Food Parks- value adding to the agriculture products etc
