The Additional Secretary,

Ministry of Skill Development and Entrepreneurship

Government of India,

Rom No.322. Sharam Shakti Bhavan,

Rafi Marg,New Delhi 110001

Dear Sir/Madam

SUBJECT: Submission of District Skill Development Plan DSDP for the year 2024-25

Ref: Officer Letter KSDC/SANKALP/DSDP/CR-05/2024-2025 date 13th June 2024

With reference to the above, we are submitting herewith District Skill Development Plan 2024-25 under the SANKALP Program for Your kind Consideration

Thanking You.

Yours faithfully,

B. Susheela.

06/08/24

Dr. Susheela B IAS

District Magistrate and

Deputy Commissioner Yadgir

METHODOLOGY

This report is prepared in consultation with various stakeholders such as the District Skill Development Department, District Industries Center, National Rural Livelihood Mission, National Urban Livelihood Mission, Center for Entrepreneurship Development of Karnataka, District Employment Exchange, Industrial Training Institutes, Polytechnics, Youth Employability Services - Kendra, Government Tool Room and Training Centre, Rural Self Employment Training Institute, Chamber of Commerce and Industries, Factories Owners Association and others too. With support from Officers of district administration, this report is developed.

The data projected in this report is taken from the following references.

- **Brief Industrial Profile of District (Invest Karnataka Report)**
- **District Wise Skill Gap Study for the State of Karnataka (NSDC)**
- **Economic Survey Report – 2020-21 – Published by Government of Karnataka**
- **DSDP Templates – Data Collected from SANKALP Team**
- **Proceedings of various district level and state level meetings attended**
- **District At A Glance 2024-25 – Published by Statistical Department**
- **Discussions with students, skill aspirants, VTP's, Trainers, resource persons and others. The methodology to prepare this report was mainly experience-driven and sample visit-based field study. However, consultation with various stakeholders has also given much input in developing the action plan.**

Curated and Prepared by:

Mr Hanamant Pujeri

Counselor **- Yadgir**

(Under the guidance of Mr. Sharanabasappa K, District Skill Development Officer)

24. TVET - Technical and Vocational Education and Training

SECTION 1: AS IN ANALYSIS

1. INTRODUCTION

Yadgir district is in the north-eastern region of Karnataka with a geographical area of 5270 square kilometers. As per 2011 Census, the population of the district was 11.74 lakh. The district comprises of 6 taluks viz. Shahapur, Wadagera, Hunasagi, Shorapur, Yadgir and Gurumatkal. The district has 16 Hoblies, 123 Grama Panchayaths, 487 inhabited villages and 26 uninhabited villages. The district is predominantly an agrarian district, which provides livelihood to nearly 73% of the total population of the district. There are 2.26 lakh cultivators and 2.35 lakh agriculture labourers in the district. The gross cropped area in the district is 4.51 lakh ha and the net sown area in the district is 3.79 lakh ha., the cropping intensity is 119%. The gross irrigated area in the district is 1.83 lakh ha and the net irrigated area in the district is 1.71 lakh ha. The average annual rainfall of the district is 719 mm with 45 rainy days. The main crops in Yadgir district are paddy, red gram, ground nut, sunflower and jowar. Major commercial crops in the district are cotton and chilly.

Picture: Map of Yadgir District

The district is administratively divided into 6 talukas namely Gurmithkala, Hunisigi, Shahapur, Shorapur, Vadagera and Yadgir.

II. LITERACY RATE

The overall literacy rate of Yadgir district is 51.83% while the male & female literacy rate 62.25 and 41.38 % respectively. At the block level, a considerable variation is noticeable in male- female literacy rate. Vadegera has the lowest literacy male and female rates at 23 and 14 percentages respectively. Shorapur block has the highest literacy rates among both males and females.

Table 3 : Literacy Rate (According to 2011 Census)

	Total	Rural	Urban
Total	51.83	47.05	72.01
Male	62.25	58.02	80.3
Female	41.38	36.05	63.92

Source : Census 2011

III. WORKFORCE

The district has a total workforce of about 5.4 lakh persons. Of this, 29% are cultivators, 43% are agricultural laborers, 2%are workers in household industry and 26% are other workers. 53.36% of the total population are non-workers.

3. ECONOMIC PROFILE

Agriculture is the backbone of the district's economy. The district predominantly has Rice Mills and Cotton Ginning & Pressing mills. There are 15 rice mills, 19 cotton ginning and pressing mills, 2 solar power plants and 1 sugar processing industry. 2510 families are involved in fisheries and 62.24 lakhs of fishlets were produced in the year 2020-21. The district is agrarian in nature and the major activities include animal husbandry, agriculture and allied activities.

Table 4 : Economic activities

Sl.No		Particulars
1.	Food crops	Paddy, Jowar, Bajra, Maize, Groundnut, Wheat, Pulses (Tur, Green gram, Bengal gram), Sunflower and other millets
2.	Commercial crops	Cotton, Sugarcane
3.	Horticulture crops	3318 hectares
4.	Net area sown	450939 hectares (73.51%)
5.	Major source of Irrigation	Canals, tube wells & tanks
6.	Area under forests	3373 hectares (6.54%)
7.	Major minerals found	Building stone, Uranium, Lime stone, Gold, Copper, Feldspar, Amethyst
8.	Major economic activities	Agriculture & allied activities, services, cattle rearing

5. MIGRATION

Migration of population has been a recurrent phenomenon since the dawn of human civilization. Migration refers to a process of "spatial separation between the location of a resident household or family and one or more livelihood activities engaged by family members" (Ellis and Freeman, 2006). Migration is the movement of people from one geographical location to another, involving permanent or temporary settlement. The region where people are leaving is referred to as the source region whereas the region to which people are entering is known as destination region. Analysis of migration pattern is important to understand the changes taking place in the People's movement within the country. It is most volatile component of population growth and most sensitive to economic, political and cultural factors (Singh, 1998). Analysis of the pattern of migration helps us to assess the role of various social and economic factors influencing migration. Major factors for migrations are unemployment, lack of irrigation facility, low agricultural productivity, limited livelihood options in rain-fed areas, poor economic condition of family, lack of credit facilities and marriage.

Table 7: Migration Data of Yadgir District

Sl. No.	Migration Parameter	Quantity	Reason	Place of migration
1.	Total outward migration	6,53,204	unemployment, , limited livelihood, poor economic condition of family, education	
2.	Intra District	2,19,142		Other blocks
3.	Inter District	96,139		Gulbarga, Raichur
4.	Intra State	3,15,281		Bengaluru Urban
5.	Inter State	21,824		Telangana, Maharashtra, Goa, Andhra Pradesh
6.	Outside India	818		Gulf countries, Ukraine

B. Short Term Skilling Programmes

The district has 21 Training Centers under Chief Minister's Kaushalya Karntaka Yojane. There are no PMKVY Centers in the district.

- **Chief Minister's Kaushalya Karnataka Yojane (CMKKY)**

  Chief Minister's Kaushalya Karnataka Yojane (CMKKY) is the state manages scheme to ensure skill development in the district in a decentralised manner. Currently, in the district, there are 15 registered training partners and 20 registered centers. 1830 candidates have been trained in the district for the financial year 2021-22.

Table 11 : Details of Accredited Training Institutions under CMKKY in Yadgir District

TOTAL		99	29	137	31
Source : District Skill Development Office - Yadgir					

- **Rural Self Employment Training Institute (RSETI)**

Rural Self Employment Training Institute is run by State Bank of India - the lead bank for the district at Yadgir. 194 beneficiaries were trained in various job roles for the year 2024-25 The institute also aids the beneficiaries in getting financial linkages to pursue entrepreneurial ventures.

7. SWOT ANALYS

Strength

- Yadgir has 30 ITI's, 5 polytechnics and 1 GTTC for long term training.
- RSETI, JSS, CEDOK ,DDUGKY, CMKKY Centers exist for short term certification program.
- Presence of Agricultural College for research and development.

Weakness

- Low literacy rate of 51.9% against state average of 75.6%.
- Lack of Industries
- Lack of private training partners
- Though cotton is a major commercial crop, no presence of ginning and negligible weaving

Opportunities

- High potential for textile and pharmaceutical industries.
- Traditional craft such as Lambani Kasuti which can be revived
- Great demand and potential for horticulture crops

Threats

- Inadequate infrastructure in skilling institutes
- Lack of opportunities due to poor presence of industries
- Mindset issue in aspirants
- Aspirants not willing to migrate

8. DISTRICT SKILL COMMITTEE

The district skill committee is formed to impart skill training that is demand-oriented than supply-centric. The District Skill Committees (DSCs) work on job fairs, skill mapping, apprenticeship promotion, monitoring and reviewing of all skilling schemes in the district. The District Skill Committee composition is as under -

Table 17: Composition of District Skill Committee

Sl. No	Member	Designation
1.	District Commissioner	Chairman
2.	Chief Executive Officer, Zilla Panchayat	Member
3.	Joint Director, District Industrial Center	Member

SECTION 2: DEMAND AGGREGATE

9. DEMAND SIDE

The district has four industrial areas/estates - Mundargi Yadgir IDA, Kadchur & Badihal IDA, Industrial Estate-Shahapur, and Industrial Estate-Shorapur. 2668 Factories in the district, with an employment of 11238 people as of March 2016. The majority of the units are auto repair and servicing units and agricultural equipment manufacturing units, along with the rice mills, engineering works units, hollow blocks units, and steel fabrication units. As of now, 21 rice mills, 20 cotton mills, and 1 sugarcane factory exists in the Yadgir district. Yadgir is known for the Malakheda stone, hence having the potential to attract the cement industry in the region. As per Karnataka Industrial Policy 2020-25, all the 3 taluks of the district are recognized as backward and classified under zone 1, which entitles all the industrial units coming up in this district to avail incentives and concessions given by the Government. During the GIM 2010, one Memorandums of Understanding (MoU) amounting to ₹ 1,584 crores was signed for the district under the power sector. in GIM 2012, eight MoUs were signed for the Yadgir district amounting to Rs. 16,444 crores.

Table 18 : Sector wise number of units in Yadgir district
(a – number of units; b – number of employees)

Sector	2022		2023		2024	
	A	B	A	B	A	B
Auto component	8	512	8	502	72	5500
Chemicals & Fertilizers	2	417	4	457	16	3634
Construction Materials & Building hardware	6	192	6	157	37	2276
Agri - Food processing & warehousing	34	442	32	416	271	4722
Power & energy	19	347	19	372	119	2606
Textile	14	377	14	377	91	3410
Total	83	2287	83	2281	606	22148

Source: Department of Factories and Boilers, Government of Karnataka 2021

From the above table, it was found that among different sectors, the Food processing (Dal / Oil Mills included) stands as a major contributor to employment accounting 45% of the total industrial units in the district, followed by power and energy the second highest units (20%), textile (15%), Auto -auto components (12%) and so on. Whereas, in terms of number of employees Auto -auto components stand first (25%), Food processing (21%), Chemical and fertilizers (16%), textile (15%) and so on.

Table 19: Sector wise contribution to the GDDP of Yadgir

Sector	INR Crores	Contribution (%)
Primary	2013	1.8
Secondary	1696	0.8
Tertiary	4569	0.9
Total District	9191	1.0

Source : Economic Survey Of Karnataka 2019-20

10. EMERGENING SECTORS

Major development projects planned by the government and industries expected in the district:

An area of 3284 acres was acquired by the government for Industrial Park in Kadechur and Badihala villages. Pharmaceutical sector - Establishment of a 'Pharma Park' SEZ in Yadgir by the government - in order to attract investors and manufacturers of pharmaceuticals and medical devices. As of 2020, phase 1 of the project is soon to be initiated (Government of Karnataka, 2020). 16 pharmaceutical and drugs industries are investing 962.5 crores which will create 3000 new jobs. 7 more industries are about to invest. Many industries have already begun construction in Kadechur.

Textile industry can be encouraged (because of large cotton-growing areas and vast stretches of black cotton soil)—1000 acres set-up for a textile park in Yadgir. The food processing sector also has potential for growth due to the presence of large areas of cultivable land (2,99,536 hectares). Potential for more sugarcane processing factories to produce sugarcane by-products. More potential in food processing is to be realized if crops are diversified - for this, horticulture should be promoted.

While the aforementioned sectors of potential were very broad, the government has specifically listed out the sectors which have been identified to be sectors with potentially good growth in Manufacturing and Processing, based on resources available in the region, the following activities have been identified by the Ministry of MSME (2012) as potential sectors for the district of Yadgir as follows-

- Dal Milling and Dal products (value-addition)
- Oil milling and edible oil extraction
- Markets for Cotton Ginning, Yarn Making, Power looms (production and operation), Leather products, Paper and Paper Products
- Cement industries and cement-based products
- Stone Cutting, polishing, and crushing

Based on demand (for labour and/or products), the following sectors have been identified by the Ministry of MSME –

- The market for Electrical fixtures, appliances and items
- Cold storage, food products and specialty foods for marketing elsewhere
- Building materials, Plastic and packaging materials, PVC pipes, Earthen and GI pipes
- Furniture (Wooden, Wrought iron, Fiberglass), Paints and varnishes, biodegradable bags, and hosiery products

Potential IT sectors and modern industrial activities identified by the Ministry of MSME-

- Organic farming, Bio-tech based manure, plant tissue culture
- Mushroom cultivation and its products
- Dairy farming, Poultry farming, Sheep and goat rearing
- O&M support and resource planning for enterprises, outsourcing business processes, electronic data processing and software development,
- Web design and hosting, legal services data processing, medical transcription and E-tutoring

11. YOUTH ASPIRATION

In the process of identifying the growth engines for the Yadgir district, discussion with a youth group in the district to understand their aspirations. The key points are summarized below:

Aspirations of students to migrate to cities like Bengaluru, Mumbai and Hyderabad for a better lifestyle and pay.

- Students aspire to get into government jobs.
- Students take additional computer-based courses along with their regular ITI and diploma training to ensure they are highly marketable in the job market.
- Preferences of trades that are suitable and helpful for their long-term careers
- Students, who are not able to get admissions to good colleges, prefer ITIs. The latter are also preferred because ITI certification helps in obtaining Government and even private jobs. The low fee is an added advantage.
- Students prefer government ITIs to private because of low fees, better infrastructure and adequate facilities, with the introduction of TATA-powered labs.
- Preferred sectors to work in are manufacturing and IT.

12. SKILL GAP ANALYSIS

In Yadgir, only Auto-auto component sector has exhibited positive and significant growth rate. However, Power and Energy, Textile and Chemicals and fertilizers sectors are found positive in their growth but not significantly positive. Whereas, Auto and auto components, Food processing and warehousing and Construction Materials and Building Hardware have exhibited negatively growth rate but not significantly negative.

Table 20 : Sector wise compounded annual growth rate of human resource from 2013 to 2023, Yadgir

Sectors	2013	2014	2015	2016	2017	2018	2019	2020	Total	CAGR(%) 2013-20
Auto - auto components	718	554	554	554	879	1227	512	502	5500	-0.06

Note **= Significant at 5%										
Source: Department of Factories and Boilers, Government of Karnataka 2021										

Based on the factories and boilers department data, the number of employees were projected up to 2025 and it was found that industries having the absorption capacity of nearly 2 % of the youths available for training (5,93,763). Based on that it is recommended to train 9,617 from the total youths available on the industry specific skills by 2025. Further, nearly 1 -2 % year on year incremental change in the industry requirement of employees was observes based on the projection, indicating needs for creating enabling factors to the growth of the industries and there is need of training the same youths in the districts so that they come move out of the district in searching the different job opportunities. It was also identified that Auto -auto components, Power and Energy, Chemicals and fertilizers, Construction Materials and Building Hardware and Food processing sectors emerging in the top five employing sectors in the districts. As these sectors accounts for nearly 93% of the total industrial employment of the districts and remaining 7% of the industry employment is shared by the Construction Materials and Building Hardware sector in the districts.

Table 21 : Sector-wise projected requirement of human resource in Yadgir (2023 to 2025)

Sector	2022	2023	2024	2025	Combined (2022-2025)

SECTION 3: GAP ANALYSIS

13. EMERGING SECTORS OF EMINENCE IN THE DISTRICT

Based on interaction with various stakeholders in the district including the training partners, youth etc. below is the list of trades demand and supply wise across the sector

Table 22: Emerging Sectors/Establishments in Yadgir District				
Sl. No	Sector	Skills Required (Based on Stakeholders Interviews)	Skill Potential/Enabling factors	Skills can be imparted (Based on ecosystem assessment)
1.	Agriculture and Allied	Machine repair and Maintenance, Seed treatment, Plant protection, post-harvest management, Marketing, Seed production	•The district has blessed with two main rivers Krishna and Bhima •Under NREGA, workers get Rs.250 daily allowance to a casual laborer undergoing skill training for specialized work. •KCC enables farmers short-term credit to meet the inputs requirements. •A vast stretch of fertile black soil good for Sugarcane and Cotton crops	•GREEN SKILL INITIATIVE: Sustainable Agriculture, Green Building, Water Harvesting and Renewable Energy Sectors •Skills related to agricultural extension services like method and result demonstration to bring new agriculture technologies from lab to land, that enables reaching new agricultural technologies to the farming community •Under the One District One Product program (PMFME), various skills in the value chain of 'GROUND NUT' can be planned in collaboration with the Agricultural department. •Marketing – Agricultural Products (Fertilizers, Pesticides, Machineries). •Repair of agricultural machinery (such as tractor, sprayer and other equipment). •Dairy farming, Sheep & Goat farming, Piggery farming, Poultry farming.

				•Artificial Insemination Technician, Animal Health Worker (First aid and Vaccination). •Various types of plant protection sprinklers, Drip Irrigation, and Nursery Preparation
2.	BFSI	Accounting Software such as Tally ERP MS Excel (Advanced for Financial Operations) and MS Word Insurance (Life and General) – Product Marketing Microfinance – Mobilisation, Disbursement and Recovery Microfinance and micro credit management	•Enhanced financial support to Joint Liability Groups (JLGs) •Promoting financial inclusion through SHG's. •Working capital financing for the units under MSME Sector (NABARD)	•Customer dealing. •Customer satisfaction. •Analytical skills. •Good knowledge of numbers and accounts. •Communication skills. •Sales and Promotion of UPI Based Payment and Business Services •Focus on key competence development: Customer-Centric Behavior, Good Communication Skills, Analytics Thinking, Learning, Crisis Management and Resilience •Future Ready Skills related to Business Analytics, Cyber Security, Digital Lending, Wealth Management Services, Insurance Technology and Block chain for graduate / technical background student
3.	Building, Construction Industry (Construction Materials and Building	•Marketing, •Liaison •Maintenances	•The district has huge land banks of 3,232 acres reserved for industrial	•BUILD GREEN: Alternative and sustainable construction technology to foster eco-friendly construction in the state.

	Hardware) and Real Estate	•Communication Skill •Bar-Bender, Mason, Plumber, Painter, Welder, Equipment Operator, Machine Operators, Mining and Plant Workers Conveyor Operator Mechanic	purposes with 2 Industrial Estates and 2 Industrial Area spread across 250km in existence here •Yadgir is one of the major suppliers of construction workers for other cities in the state as well as for the neighboring states •The construction sector provides the largest seasonal employment in India, next only to agriculture. •Yadgir also provides construction resources to other cities in Karnataka and neighboring states •This sector can accommodate more	•Property Management, Rent, Mortgage services •AUTOCAD and other top designing Software – for Designing and lay-outing •Future Ready Skills related to Sustainable Building, Green Building, Handling and Servicing Construction Equipment, Construction Vehicle segments

			minimally skilled (about 80%) •The sector is adopting automation very rapidly •The Construction Industry is expected to reach $1.4 Tn by 2025 in India	
4.	Chemicals and Pharmaceuticals	Formulation, Drug Testing, Clinical Trials, Waste handling and BioSafety, Laboratory diagnostics/tests (Blood test, dialysis etc.)	•The state has exclusive pharma SEZs in Yadgir. •Pharma Industrial Park at Yadgir (3,232 acres) •The extent of land-500 acres located in Kadechur and Badihala village (approx. 38 km from Yadgir city •Nearly 30-40 companies are ready to operat	•Bio-safety measures •Waste management skills •Focus on Skills Related to Agro-Chemicals, Fertilizers, Petrochemicals and Specialty Chemicals
5.	Food Processing	•Food processing equipment repairs	•High Demand for Food Suppliers and Delivery	Women focused, livelihood activities to be promoted in convergence with NRLM / NULM

		and maintenance, •Processing of agricultural products •Catering •Food Suppliers and Delivery Persons •Small Restaurant Management •Food Safety and Safe Manufacturing Practices •Bakery Products	Persons in major cities – Gig Economy / Platform Jobs •An increasing number of quick-service restaurants	•Ground Nut Based Food Processing Skills may be imparted in line with OROP Initiative. •Food Grain Milling (including Oil seeds) •Basic Food Processing Industry Training – Milling, Grading, Cleaning, Sprouting, Fermenting, Grinding, Steaming, Packaging and Hygiene can be conceptualized and imparted
6.	Furniture and Furnishings	•Carpentry wood carving sales and marketing, •RPL and Skill Upgradation Courses for Carpenters	•Market Potential in Telangana for Ready types of Furniture and also for skilled workers	•Carpenters Co-Operatives may be formed, and tie-up with Furniture Companies may be facilitated •Repair and Servicing of Office Furniture
7.	Textile and Clothing	•Tailoring •Embroidery •Courses for handloom •Sewing Machine Operators	• The district has about 1000 looms spread all over the region. • Yadgir Mega Textile T Zone (1,000 acres)	• Specific Skills related to blow room, carding, drawing, roving, spinning, winding and finishing are crucial for the garment industry

		•Quality Control •Maintenance Operators	• The Khadi and Village Industries Board is responsible for PM Employment Generating Program. They have a target for 69 units for this year for the budget of Rs. 54,00,00	
8.	Healthcare Services	•Trained nurses and Para Medical Staff for geriatric care, Bed Side Assistants, Home Nursing, General Duty Assistants •Frontline Health Workers and Community Health Workers (for NGO Sector and Health Dept) •Lab Technicians (Assistants) •Counter Sales Executive – Health and Wellness	•The Healthcare industry in India is projected to reach $372 bn by 2022	•Emergency medical technician, Diagnostic, Curative services, Frontline workers (as a reserve health army) to meet emergency pandemic like situations as well as for mission mode community health operations. •Ayurveda Therapy •Telemedicine and Health Insurance

		Centers / Chemist Shops		
9.	Transportation, Logistics, Warehousing and Packaging	•Driving Skills, Ware House Operation (Management / Assistance) Skills, •Packaging	•Construction of fiat bogies factory at Badiyal, 150 acres of land has been handed over to Railways.	• Invoice development skills •Customs documentation • Inventory management software •Distribution management
10.	Power/Energy	N/A	• Rich uranium deposits in the Gogi belt covering the villages of Gogi, Ukkinal, Darshanapur in Shahapur taluk, and Thinthini and other places in Surapur taluk.	•GREEN ENERGY: Harvesting renewable energy, particularly solar energy •Solar voltaic-cell installer •Plant and Equipment Maintenance • Installation and Servicing of Solar Pumps and other solar equipment
Source : GRAAM Report : Skill Gap Analysis for Yadgir District				

14. STRATEGIES AND PRIORITIES BASED ON SWOT AND OTHER INPUTS

- Long term Technical Training Institutions can be explored to be part of Short-Term Training Centres. Many of the private ITI's, Polytechnics, Degree colleges can be encouraged to take up Employment oriented short-term programs
- District having a well irrigated land has the yield less than State and national average youth need to be motivated towards more of Agricultural related skills like Dairy farming, Organic Farming, etc. related skills.
- Only 4 Blocks/Taluks have small number of Short-Term Training Centres for the youth population in the district. More Training Centres to be opened based on the demand of requirements of the local and state level employment. As a start at least three training centres in each of the blocks have to be started in priority sectors like Banking, retail, logistics and Hospitality.
- Increase the number of the Primary Sector Training institutions to maximize the yield of the agriculture produce. Post Harvesting and Food Preservation is also other skills which the youth have to be trained..
- Counselling and Mobilization has to be strengthened to include more of SC, ST, Women and minorities population of the district.
- Many of the native skills like handloom are on the verge of extinct and should be encourage by opening up more and more native skills related training centre near the vicinity of the native skill industry.

SECTION 4 - ACTION PLAN

15. EXISTING SCHEMES & INITIATIVES

For the financial year, 2020-21 the State Skill Mission and the central ministry have taken adequate measures to ensure the propagation of skilling in the district. The listing below is the key initiatives/programmes that were part of skilling activities during the year.

• Industry Linkage Cell

The Industry Linkage Cell (ILC) is an initiative under the state skill development mission to ensure demand based skill training is achieved throughout the state. This is done via the collaboration between the industry partners and state skill development mission. It aims to improve the overall quality and relevance of the skill ecosystem in the state. This is a step forward in the direction of institutional strengthening to provide quality training and better job opportunities to the candidates seeking relevant employment. This will ensure that the gap between the industry expectation and skilling provided to the candidates is reduced. With this system the candidates trained by the industries, who would be responsible for the overall skilling of the candidates could absorb the candidate into their system. This addresses two major challenges: o Employment for the candidates from ITI's and technical course. o Having manpower in the industry.

• ITI's Upgradation by TATA Technologies LTD

The lack of employment opportunities for a majority of young employable Indians and also lack of skilled resources available to industries in India has become a growing concern today. Both these challenges stem from the same cause, which is lack of high-end good quality training facilities. It is now pertinent that the government of Karnataka

takes a leading role in revamping and upgrading existing training facilities and also in establishing new modern centers. In response to this need, Tata Technologies Ltd has designed a unique industry led initiative. Up gradation of all government owned Industrial Training Institutes (ITIs) in Karnataka. The detailed Project Proposal is for Up-gradation of government owned Industrial Training Institutes (ITIs) in Karnataka is also made and presented to the government.

• Convergence of Skill Schemes

The State Skill Development Mission is actively in the quest to improve the overall skill ecosystem in the state. One such activity performed by the state skill development mission is the convergence of various stakeholders/mission under the Skill Mission umbrella at the district level. As part of the convergence NULM, NRLM, GTTC, ITI, CEDOK, YES SEVA KENDRA are all coordinating with the District Skill Development Officer after convergence. This ensures that the skill development mission is responsible for the following activities:

o Mobilization and counselling

o Synergy and coordination across departments

o Creation of action plan

o Monitoring and Reporting

This ensures a level of autonomy is achieved at the district level. The way forward topics such as collective mobilization, addressing staff unavailability, potential sectors, consolidated action plan and implementation are being worked out accordingly.

• One district One Skill (ODOS)

The Sate Skill Development Mission in order to revive traditional art and craft skills in the district conceptualized the idea of One District One Skill (ODOS). Lambani Kasuti Embroidery has been identified as the ODOS for the District. ODOS would ensure the people in the district employed in traditional craft and the final product could be benefited either by the ways of financial linkages, upgradation of their existing technologies or by upskilling them.

• Job Fair

The district skill mission has conducted three job fairs in the district in August 2021, December 2021 and Jan 2023 in a bid to bridge the gap between demand and supply of talent in the district.

Table 23 : Job Fair Details

Details	21.12.2021	22.02.2022	12.01.2023
Number of companies	13	10	16
Total candidates	687	328	687
Selected	103	56	129
Source :District Skill Development Office, Yadgir			

Major companies which participated in the job fair were from automobile, microfinance and insurance sectors.

- 68 candidates were employed in Microfinance sectors.
- 32 candidates were employed in Core Green Sugar Factory, Yadgir.
- 29 candidates were employed in Automobile sector

Component – 1: Establishment of Value Added Fish Processing Unit and Skilling in Fish Food Processing

In Yadgir District, there are a total of 76 Tanks by Panchayat Raj, 263 tanks of Minor Irrigation Department, 2510 families are involved full time on fisheries activities and they are generating revenue for their daily needs. In 2019-20, the District Administration recorded 2465 tons of fish catch. Also, Yadgir is one of the significant producers of fish catch in inland fresh water fisheries. Fish producers of Yadgir district are currently supplying fresh fish to different markets like Hyderabad, Davengere and Ballary Market across Karnataka and also concentrating to supply to Fish Processing Plants located at Bhimavaram, Nellur of Andhrapradesh. Fish farmers of Yadgir District also ventured into culturing of fresh water prawn and supplying to Dakshina Kannada region. There are number of Farmer produce organizations are working with fish processing activities but they are lagging behind the value addition to their produce. The proposed activities under this component are:

- To create skilled workforce in Fish processing and value addition sector
- To improve the infrastructure facilities at Yadgir district to implement the training program.
- To create one of the best modern integrated fresh water fish processing incubation center in terms of products and processing innovation.
- To utilize completely fresh water fish and creating value addition for processing waste thereby minimizing the environmental pollution.
- To create awareness on the importance of fresh water fish in human nutrition among different section of population especially among school children and women.
- To promote exports of value added fish products to domestic and international markets after labelling and branding.
- To create an alternative livelihood and upliftment of socio-economic status of fisher folk who are actively involved post-harvest fisheries activities.

Component 2: One District One Skill - Lambani Kasuti Embroidery

- ## Initiative for proliferation of Yadgir Handicraft Products with a modular value addition approach to the Manufacturing Chain

  - The Lambani community is one of the poorest communities in Yadgir and is engaged in agricultural labor. Since agriculture work is seasonal, they have to migrate to find a job. Most of them migrate to work in the sugarcane fields in the neighboring districts, where harvesting usually starts in October and continues for about five months. Rich in culture and traditions, the community survives on odd jobs. The Lambani community is known for their embroidery, a combination of mirror work, cross-stitch, overlaid, and quilting stitches with the borders of applique patchwork. Most women from the community are well-versed in the art. These women not well-versed in contemporary and minimalistic signs and fail to sell their products to the urban population as most of their designs are traditional, heavy, and outdated. The component aims to establish a long-term and sustainable value chain for Lambani handicraft products by leveraging marginalized communities' embroidering skills and entrepreneurial potential, especially youth and| women in Yadgir. For this, two verticals under this intervention are proposed.
  - Vertical 1: Increase the profitability of embroiders and tailors by building their capacities by design intervention and market linkage.
  - Vertical 2: To bring out a niche product from the district.

Component 3: One District One Product –Groundnut Products

- Groundnut products have been recognized as the ODOP for Yadgir District. Skill transfer and handholding can be provided to MSMEs entering into food processing sector.
  - Various groundnut products which have high demand in the market are Peanut butter, Ready to eat savory snacks and cold pressed groundnut oil.
  - The residue after the compression can be used as fertilizers and cattle feed.

Component 4: Career counselling to high school and college students

- The literacy rate of Yadgir district is lower than that of the state average. For the academic year 2022-23 a total of 36000 and 30000 students will be passing out 10th standard and Pre-University respectively. Most students are unaware of future career prospects and have difficulty in selecting graduating major. It is proposed to conduct regular career counselling at schools and colleges and also impart soft skills.
